**Footnotes**

Percentages are stated as a percent of net assets.

(a) All or a portion of this security was out on loan.

(b) Variable rate obligation. The coupon rate shown represents the rate at period end.

(c) The investment is an affiliate of the fund, the adviser and/or the subadviser.

(f) 144A: Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.

(g) John Hancock Cash Investment Trust is managed by MFC Global Investment Management (U.S.), LLC, and represents investment of securities lending collateral.

The rate shown is the seven-day effective yield at period end.

The accompanying notes are an integral part of the financial statements.

**Notes to the Schedule of Investments (Unaudited)**

**Security valuation**

The net asset value of the Fund is determined daily as of the close of the New York Stock Exchange (NYSE), normally at 4:00 p.m., Eastern Time. Short-term debt investments that have a remaining maturity of 60 days or less are valued at amortized cost, and thereafter assume a constant amortization to maturity of any discount or premium, which approximates market value. All other securities held by the Fund are valued at the last sale price or official closing price (closing bid price or last evaluated quote if no sale has occurred) as of the close of business on the principal securities exchange (domestic or foreign) on which they trade or, lacking any sales, at the closing bid price. Securities traded only in the over-the-counter market are valued at the last bid price quoted by brokers making markets in the securities at the close of trading. Securities for which there are no such quotations, principally debt securities, are valued based on the evaluated prices provided by an independent pricing service, which utilizes both dealer-supplied and electronic data processing techniques, which take into account factors such as institutional-size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data. Investments in John Hancock Cash Investment Trust (JHCIT), an affiliate of John Hancock Advisers, LLC (the Adviser), a wholly owned subsidiary of John Hancock Financial Services, Inc., a subsidiary of Manulife Financial Corporation, are valued at their net asset value each business day

Other portfolio securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith by the Trust's Pricing Committee in accordance with procedures adopted by the Board of Trustees. Generally, trading in non-U.S. securities is substantially completed each day at various times prior to the close of trading on the NYSE. The values of such securities used in computing the net asset value of the Fund's shares are generally determined as of such times. Occasionally, significant events that affect the values of such securities may occur between the times at which such values are generally determined and the close of the NYSE. Upon such an occurrence, these securities will be valued at fair value as determined in good faith under consistently applied procedures established by and under the general supervision of the Board of Trustees. Debt securities whose prices cannot be provided by an independent pricing service are valued at prices provided by broker-dealers.

Valuations change in response to many factors including the historical and prospective earnings of the issuer, the value of the issuer's assets, general economic conditions, interest rates, investor perceptions and market liquidity.

The Fund adopted Statement of Financial Accounting Standards No. 157 (FAS 157), *Fair Value Measurements*, effective with the beginning of the Fund's fiscal year. FAS 157 established a three-tier hierarchy to prioritize the assumptions, referred to as inputs, used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below:

Level 1 – Quoted prices in active markets for identical securities.

Level 2 – Prices determined using other significant observable inputs. Observable inputs are inputs that other market participants would use in pricing a security. These may include quoted prices for similar securities, interest rates, prepayment speeds, credit risk and others.

Level 3 – Prices determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable, such as when there is little or no market activity for an investment, unobservable inputs may be used. Unobservable inputs reflect the Fund's own assumptions about the factors that market participants would use in pricing an investment and would be based on the best information available.

---

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value the Fund's net assets as of November 30, 2008:

<b>Valuation Inputs</b>	<b>Investments in Securities</b>	<b>Other Financial Instruments*</b>
Level 1 - Quoted Prices	\$483,100	-
Level 2 - Other Significant Observable Inputs	516,019,839	-
Level 3 - Significant Unobservable Inputs	-	-
<b>Total</b>	<b>\$516,502,939</b>	<b>-</b>

\* Other financial instruments are derivative instruments not reflected in the Portfolio of Investments, such as futures, forwards and swap contracts, which are valued at the unrealized appreciation/depreciation on the instrument.

#### **Federal income tax cost**

At November 30, 2008, the aggregate cost of investment securities for federal income tax purposes was \$671,386,113. Net unrealized depreciation aggregated \$154,883,174, of which \$418,262 related to appreciated investment securities and \$155,301,436 related to depreciated investment securities.

#### **Loan participations and assignments**

A fund's ability to receive payments of principal and interest and other amounts in connection with loans (whether through participations, assignments or otherwise) will depend primarily on the financial condition of the borrower. The failure by a fund to receive scheduled interest or principal payments on a loan or a loan participation, because of a default, bankruptcy or any other reason, would adversely affect the income of the fund and would likely reduce the value of its assets. Even with secured loans, there is no assurance that the collateral securing the loan will be sufficient to protect a fund against losses in value or a decline in income in the event of a borrower's non-payment of principal or interest and, in the event of a bankruptcy of a borrower, the fund could experience delays or limitations in its ability to realize the benefits of any collateral securing the loan. Furthermore, the value of any such collateral may decline and may be difficult to liquidate. Because a significant percent of loans and loan participations are not generally rated by independent credit rating agencies, a decision by a fund to invest in a particular loan or loan participation could depend exclusively on the subadviser's credit analysis of the borrower and, in the case of a loan participation, the intermediary. A fund may have limited rights to enforce the terms of an underlying loan. Fees associated with loan amendments are accrued daily. At period end, the total principal amount and market value of unfunded commitments totaled \$2,190,329 and \$2,024,134, respectively, which could be extended at the option of the borrower and which are covered by sufficient cash and/or liquid securities held by the Fund.

#### **Repurchase agreements**

Pursuant to an exemptive order issued by the SEC, the Fund, along with other registered investment companies having a management contract with the Adviser, may participate in a joint repurchase agreement transaction. Aggregate cash balances are invested in one or more large repurchase agreements, whose underlying securities are obligations of the U.S. government and/or its agencies. The Fund's custodian bank receives delivery of the underlying securities for the joint account on the Fund's behalf. When a Fund enters into a repurchase agreement, it receives delivery of collateral, the amount of which at the time of purchase and each subsequent business day is required to be maintained at such a level that the value is generally 102% of the repurchase amount.

---

#### **Securities lending**

The Fund may lend portfolio securities from time to time in order to earn additional income. The Fund retains beneficial ownership of the securities it has loaned and continues to receive interest and dividends paid by the issuer of securities and to participate in any changes in their value. On the settlement date of the loan, the Fund receives cash collateral against the loaned securities and maintain the cash collateral in an amount not less than 102% of the market value of the loaned securities for U.S. equity and corporate securities and 105% for foreign equity and corporate securities during the period of the loan. The market value of the loaned securities is determined at the close of business of the Fund and any additional required cash collateral is delivered to the Fund on the next business day. Cash collateral received is invested in the JHCIT. The Fund may receive compensation for lending their securities either in the form of fees, guarantees, and/or by retaining a portion of interest on the investment of any cash received as collateral. If the borrower defaults on its obligation to return the securities loaned because of insolvency or other reasons, the Fund could experience delays and costs in recovering the securities loaned or in gaining access to the collateral. The Fund bears the risk in the event that invested collateral is not sufficient to meet obligations due on loans.

#### **Risk and Uncertainties**

##### **Concentration risk**

The Funds may concentrate investments in a particular industry, sector of the economy or invest in a limited number of companies. Accordingly, the concentration may make the Fund's value more volatile and investment values may rise and fall more rapidly. In addition, a fund with a concentration is particularly susceptible to the impact of market, economic, regulatory and other factors affecting the specific concentration.

##### **Fixed income risk**

Fixed income securities are subject to credit and interest rate risk and involve some risk of default in connection with principal and interest payments.

## Liquidity risk

The Fund may be exposed to liquidity risk. This exposure exists when trading volume, lack of a market maker, or legal restrictions impair the ability to sell particular securities or close derivative positions at an advantageous price.

5

**Notes to the Schedule of Investments (Unaudited)****Securities valuation**

The net asset value of each Lifecycle Portfolio is determined daily as of the close of the New York Stock Exchange ("NYSE"), normally at 4:00 p.m., Eastern Time. Investments by the Lifecycle Portfolios in underlying affiliated funds are valued at their respective net asset values each business day and securities in the underlying funds are valued in accordance with their respective valuation policies, as outlined in the underlying funds' financial statements. Short-term debt investments that have a remaining maturity of 60 days or less are valued at amortized cost, and thereafter assume a constant amortization to maturity of any discount or premium, which approximates market value. All other securities held by the Portfolios and by the underlying affiliated funds are valued at the last sale price or official closing price (closing bid price or last evaluated quote if no sale has occurred) as of the close of business on the principal securities exchange (domestic or foreign) on which they trade or, lacking any sales, at the closing bid price. Securities traded only in the over-the-counter market are valued at the last bid price quoted by brokers making markets in the securities at the close of trading. Securities for which there are no such quotations, principally debt securities, are valued based on the valuation provided by an independent pricing service, which utilizes both dealer-supplied and electronic data processing techniques, which take into account factors such as institutional size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data.

Other portfolio securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith by the Trust's Pricing Committee in accordance with procedures adopted by the Board of Trustees. Generally, trading in non-U.S. securities is substantially completed each day at various times prior to the close of trading on the NYSE. The values of such securities used in computing the net asset value of the Fund's shares are generally determined as of such times. Occasionally, significant events that affect the values of such securities may occur between the times at which such values are generally determined and the close of the NYSE. Upon such an occurrence, these securities will be valued at fair value as determined in good faith under consistently applied procedures established by and under the general supervision of the Board of Trustees. Debt securities whose prices cannot be provided by an independent pricing service are valued at prices provided by broker-dealers.

The Portfolios adopted Statement of Financial Accounting Standards No. 157 (FAS 157), *Fair Value Measurements*, effective with the beginning of the Portfolios' fiscal year. FAS 157 established a three-tier hierarchy to prioritize the assumptions, referred to as inputs, used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below:

Level 1 - Quoted prices in active markets for identical securities.

Level 2 - Prices determined using other significant observable inputs. Inputs other than quoted prices included in Level 1 that are observable either directly or indirectly through corroboration with observable market data. These may include quoted prices for similar securities, interest rates, prepayment speeds, credit risk and others.

Level 3 - Prices determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable, such as when there is little or no market activity for an investment, unobservable inputs may be used. Unobservable inputs reflect the Portfolios' own assumptions about the factors that market participants would use in pricing an investment and would be based on the best information available.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following tables are a summary of the inputs used to value the Portfolios' net assets as of November 30, 2008. Other financial instruments are derivative instruments not reflected in the Portfolio of Investments, such as futures, forwards and swap contracts, which are valued at the unrealized appreciation/depreciation on the instrument.

Level 3 - Significant Unobservable Inputs	-	-

\* Other financial instruments are derivative instruments not reflected in the Portfolio of Investments, such as futures, forwards and swap contracts, which are valued at the unrealized appreciation/depreciation on the instrument.

### Futures

Lifecycle Retirement may purchase and sell financial futures contracts and options on those contracts. The Portfolio may invest in contracts based on financial instruments such as U.S. Treasury Bonds or Notes, or on securities indices such as the S&P 500 Index, in order to hedge against a decline in the value of securities owned by the Portfolio.

Initial margin deposits required upon entering into futures contracts are satisfied by the delivery of specific securities or cash as collateral to the broker (the Portfolios' agent in acquiring the futures position). If the position is closed out by an opposite position prior to the settlement date of the futures contract, a final determination of variation margin is made, cash is required to be paid to or released by the broker and the Portfolio realizes a gain or loss.

When the Portfolio sells a futures contract based on a financial instrument, the Portfolio becomes obligated to deliver that kind of instrument at an agreed upon date for a specified price. The Portfolio realizes a gain or loss depending on whether the price of an offsetting purchase is less or more than the price of the initial sale or on whether the price of an offsetting sale is more or less than the price of the initial purchase. The Portfolio could be exposed to risks if it could not close out futures positions because of an illiquid secondary market or the inability of counterparties to meet the terms of their contracts. Futures contracts are valued at the quoted daily settlement prices established by the exchange on which they trade.

The following is a summary of open futures contracts at November 30, 2008:

Portfolio	Open Contracts	Number of Contracts	Position	Expiration Date	Notional Value	Unrealized Appreciation (Depreciation)
Lifecycle Retirement	S&P 500 E-mini Futures	95	Long	Dec 2008	\$4,252,675	(\$1,610,868)
	U.S. Treasury 10-Year Note Futures	30	Short	Dec 2008	3,686,719	(156,773)
						<b>(\$1,767,641)</b>

### Cost of investment securities for federal income tax purposes

At November 30, 2008, the aggregate security unrealized appreciation and depreciation based on the cost of investment securities for U.S. federal income tax purposes were as follows:

Fund	Aggregate Cost	Unrealized Appreciation	Unrealized (Depreciation)	Net Unrealized Appreciation (Depreciation)
Lifecycle 2045	\$129,521,865	-	(\$46,229,186)	(\$46,229,186)
Lifecycle 2040	146,699,548	-	(52,880,686)	(52,880,686)
Lifecycle 2035	207,803,110	-	(75,819,334)	(75,819,334)
Lifecycle 2030	280,783,137	-	(102,161,232)	(102,161,232)
Lifecycle 2025	355,377,201	-	(126,009,102)	(126,009,102)
Lifecycle 2020	344,024,942	\$7,717	(119,097,451)	(119,089,734)
Lifecycle 2015	269,288,236	-	(88,694,723)	(88,694,723)
Lifecycle 2010	148,579,378	-	(45,333,016)	(45,333,016)
Lifecycle Retirement	247,026,533	69,800	(67,763,050)	(67,693,250)

## Notes to the Schedule of Investments (Unaudited)

**Security Valuation** The net asset value of each Fund is determined daily as of the close of the NYSE, normally at 4:00 p.m., Eastern Time. Investments held by the Fund in underlying affiliated funds are valued at their respective net asset values each business day. Short-term debt investments that have a remaining maturity of 60 days or less are valued at amortized cost, and thereafter assume a constant amortization to maturity of any discount or premium, which approximates market value. Investments in John Hancock Cash Investment Trust ("JHCIT"), an affiliate of the John Hancock Adviser, LLC ("JHA"), a wholly owned subsidiary of John Hancock Financial Services, Inc., a subsidiary of MFC, are valued at their net asset value each business day. Swaps are generally valued at an evaluated bid as reported by an independent pricing service. All other securities held by the Funds and by the underlying affiliated funds are valued at the last sale price or official closing price (closing bid price or last evaluated quote if no sale has occurred) as of the close of business on the principal securities exchange (domestic or foreign) on which they trade or, lacking any sales, at the closing bid price. Securities sold short are valued at the closing asking price. Securities traded only in the over-the-counter market are valued at the last bid price quoted by brokers making markets in the securities at the close of trading. Securities for which there are no such quotations, principally debt securities, are valued based on the valuation provided by an independent pricing service, which utilizes both dealer-supplied and electronic data processing techniques, which take into account factors such as institutional -size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data.

Other portfolio or fund securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith by the Trust's Pricing Committee in accordance with procedures adopted by the Board of Trustees. Generally, trading in non-U.S. securities is substantially completed each day at various times prior to the close of trading on the NYSE. The values of such securities used in computing the net asset value of a Fund's shares are generally determined as of such times. Occasionally, significant events that affect the values of such securities may occur between the times at which such values are generally determined and the close of the NYSE. Upon such an occurrence, these securities will be valued at fair value as determined in good faith under consistently applied procedures established by and under the general supervision of the Board of Trustees.

Valuations change in response to many factors including the historical and prospective earnings of the issuer, the value of the issuer's assets, general economic conditions, interest rates, investor perceptions and market liquidity.

Certain Funds of the Trust may invest a portion of their assets in securities of issuers that hold mortgage securities including subprime mortgage securities. The value of these securities is sensitive to changes in economic conditions, including delinquencies and/or defaults and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates.

The Funds adopted Statement of Financial Accounting Standards No. 157 (FAS 157), Fair Value Measurements, effective with the beginning of the Fund's fiscal year. FAS 157 established a three-tier hierarchy to prioritize the assumptions, referred to as inputs, used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below:

Level 1 - Quoted prices in active markets for identical securities

Level 2 - Prices determined using other significant observable inputs. Inputs other than quoted prices included in Level 1 that are observable either directly or indirectly through corroboration with observable market data. These may include quoted prices for similar securities, interest rates, prepayment speeds, credit risk and others.

Level 3 - Prices determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable, such as when there is little or no market activity for an investment, unobservable inputs may be used. Unobservable inputs reflect the Funds' own assumptions about the factors that market participants would use in pricing an investment and would be based on the best information available.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following tables are a summary of the inputs used to value the Funds' net assets as of November 30, 2008 and a reconciliation of Level 3 assets for which significant unobservable inputs were used to determine fair value. Other financial instruments are derivative instruments not reflected in the Portfolio of Investments, such as futures, forwards and swap contracts, which are valued at the unrealized appreciation / depreciation on the instrument.

**Repurchase Agreements** Each Fund may enter into repurchase agreements. When a Fund enters into a repurchase agreement through its custodian, it receives delivery of securities, the amount of which at the time of purchase and each subsequent business day is required to be maintained at such a level that the market value is generally at least 102% of the repurchase amount. Each Fund will take receipt of all securities underlying the repurchase agreements it has entered into until such agreements expire. If the seller defaults, a Fund would suffer a loss

to the extent that proceeds from the sale of underlying securities were less than the repurchase amount. Each Fund may enter into repurchase agreements maturing within seven days with domestic dealers, banks or other financial institutions deemed to be creditworthy by the Adviser. Collateral for certain tri-party repurchase agreements is held at the custodian bank in a segregated account for the benefit of the Fund and the counterparty.

**Foreign Currency Transactions** The books and records of the Funds are maintained in U.S. dollars. Investment securities and other assets and liabilities denominated in a foreign currency are translated into U.S. dollars at the prevailing exchange rates at period end. Purchases and sales of investment securities, income and expenses are translated into U.S. dollars at the prevailing exchange rates on the respective dates of the transactions.

Net realized and unrealized gains and losses on foreign currency transactions represent net gains and losses between trade and settlement dates on securities transactions, the disposition of forward foreign currency exchange contracts and foreign currencies, and the difference between the amount of net investment income accrued and the U.S. dollar amount actually received. That portion of both realized and unrealized gains and losses on investments that results from fluctuations in foreign currency exchange rates is not separately disclosed but is included with net realized and unrealized gain/appreciation and loss/depreciation on investments.

Certain Funds may be subject to capital gains and repatriation taxes imposed by certain countries in which they invest. Such taxes are generally based upon income and/or capital gains earned or repatriated. Taxes are accrued based upon net investment income, net realized gains and net unrealized appreciation.

Certain Funds invest in securities of issuers based in countries with emerging markets or economies and may, therefore, be subject to greater market risk than Funds that invest principally in securities of issuers in more developed countries. Emerging markets securities may be more volatile and less liquid than securities of issuers in developed countries and may be subject to substantial currency fluctuations and affected by sudden economic, social and political developments in the emerging market country. The securities markets of emerging countries may have less government regulation and may be subject to less extensive accounting and financial reporting requirements than the securities markets of more developed countries. Emerging market countries may have currency controls or restrictions which may prevent or delay a Fund from taking money out of the country or may impose additional taxes on money removed from the country.

**Options** All Funds may purchase and sell put and call options on securities (whether or not it holds the securities in its portfolio), securities indices, currencies and futures contracts.

When a Fund writes a put or call option, an amount equal to the premium received by the Fund is recorded as a liability and is subsequently "marked -to-market" to reflect the current market value of the option written. If an option expires or if the Fund enters into an offsetting purchase option, the Fund realizes a gain (or loss if the cost of an offsetting purchase option exceeds the premium received when the option was written). If a written call option is exercised, the Fund realizes a gain or loss from the sale of the underlying security with the proceeds of the sale increased by the premium originally received. If a written put option is exercised, the amount of the premium originally received reduces the cost of the security that the Fund purchases upon exercise of the option.

A Fund, as writer of an option, may have no control over whether the underlying securities may be sold (call) or purchased (put) and, as a result, bears the market risk of an unfavorable change in the price of the securities underlying the written option.

When a Fund purchases a put or call option, the premium paid by the Fund is included in the Portfolio of Investments and subsequently "marked -to-market" to reflect the current market value of the option. If the purchased option expires, the Fund realizes a loss for the cost of the option. If a Fund enters into a closing sale transaction, the Fund realizes a gain or loss, depending on whether proceeds from the closing sale transaction are greater or less than the original cost of the option. If a Fund exercises a call option, the cost of the securities acquired by exercising the call is increased by the premium paid to buy the call. If a Fund exercises a put option, it realizes a gain or loss from the sale of the underlying security and the proceeds from such sale are decreased by the premium originally paid.

The Funds may use options to manage exposure to fluctuations in currency values. Writing puts and buying calls may increase the Fund's exposure to the underlying instrument. Buying puts and writing calls may decrease a Fund's exposure to the underlying instrument. Losses may arise from changes in the value of the underlying instruments if there is an illiquid secondary market for the contracts or if the counterparties do not perform under the terms of the contract.

The following is a summary of open written options outstanding as of November 30, 2008:

#### Options on Exchange-Traded Futures Contracts

Fund	Name of Issuer	Exercise Price	Expiration Date	Number of Contracts	Premium	Value

							<b>300,100,000</b>	<b>\$8,499,252</b>	<b>(\$24,538,563)</b>

**Securities Lending** The Funds, except Absolute Return and the American Funds, may lend portfolio securities from time to time in order to earn additional income. The Funds retain beneficial ownership of the securities it has loaned and continue to receive interest and dividends paid by the issuer of securities and to participate in any changes in their value. On the settlement date of the loan, the Funds receive cash collateral against the loaned securities and maintain the cash collateral in an amount not less than 102% of the market value of the loaned securities for U.S. equity and corporate securities and 105% for foreign equity and corporate securities during the period of the loan. The market value of the loaned securities is determined at the close of business of the Funds and any additional required cash collateral is delivered to the Funds on the next business day. Cash collateral received is invested in the JHCIT. The Funds may receive compensation for lending their securities either in the form of fees, guarantees, and/or by retaining a portion of interest on the investment of any cash received as collateral. If the borrower defaults on its obligation to return the securities loaned because of insolvency or other reasons, the Funds could experience delays and costs in recovering the securities loaned or in gaining access to the collateral. The Funds bear the risk in the event that invested collateral is not sufficient to meet obligations due on loans.

**Mortgage Dollar Rolls** All Funds, with the exception of the Absolute Return Portfolio, may enter into mortgage dollar rolls in which they sell debt securities for delivery currently and simultaneously contract to repurchase similar, but not identical, securities at the same price or a lower price on an agreed upon date. The Funds account for such dollar rolls as purchases and sales and receive compensation as consideration for entering into the commitment to repurchase. The compensation is the difference between the current sale price and the forward price for the future purchase (often referred to as the "drop") as well as the interest earned on the cash proceeds of the initial sale. A Fund may also be compensated by the receipt of a commitment fee. As the holder, the counterparty receives all principal and interest payments, including prepayments, made with respect to the similar security. Dollar rolls may be renewed with a new sale and repurchase price with a cash settlement made at renewal without physical delivery of the securities subject to the contract.

Certain risks may arise upon entering into mortgage dollar rolls from the potential inability of counterparties to meet the terms of their commitments. Additionally, the value of such securities may change adversely before the Fund is able to repurchase them. There can be no assurance that the Fund's use of the cash that it receives from a mortgage dollar roll will provide a return that exceeds its costs.

**Inflation -Indexed Bonds** All Funds of the Trust with the exception of the Absolute Return Portfolio, may invest in inflation -indexed bonds. Inflation -indexed bonds are fixed-income securities whose principal value is periodically adjusted to the rate of inflation. The interest rate on these bonds is generally fixed at issuance at a rate lower than typical bonds. Over the life of an inflation -indexed bond, however, interest will be paid based on a principal value, which is adjusted for inflation.

**Short Sales** Certain Funds may make short sales of securities. This means a Fund may sell a security that it does not own in anticipation of a decline in the market value of the security. The Fund generally borrows the security to deliver to the buyer in a short sale. The Fund must then buy the security at its market price when the borrowed security must be returned to the lender. Short sales involve costs and risk. The Fund must pay the lender interest on the security it borrows, and the Fund will lose money if the price of the security increases between the time of the short sale and the date when the Fund replaces the borrowed security. Certain of the Funds may also make short sales "against the box." In a short sale against the box, at the time of sale, the Fund owns or has the right to acquire the identical security, or one equivalent in kind or amount, at no additional cost.

Until a Fund closes its short position or replaces a borrowed security, the Fund will (i) segregate with its custodian cash or other liquid assets at such a level that the amount segregated plus the amount deposited with the lender as collateral will equal the current market value of the security sold short or (ii) otherwise cover its short position. Possible losses from short sales may be unlimited, whereas losses from purchases cannot exceed the total amount invested.

**Futures** All Funds may purchase and sell financial futures contracts and options on those contracts. The Funds may invest in contracts based on financial instruments such as U.S. Treasury Bonds or Notes or on securities indices such as the S&P 500 Index, in order to hedge against a decline in the value of securities owned by the Funds.

Initial margin deposits required upon entering into futures contracts are satisfied by the pledging of specific securities or cash as collateral at the broker (the Funds' agent in acquiring the futures position). If the position is closed out by taking an opposite position prior to the settlement date of the futures contract, a final determination of variation margin is made, cash is required to be paid to or released by the broker and the Fund realizes a gain or loss.

When a Fund sells a futures contract based on a financial instrument, the Fund becomes obligated to deliver that kind of instrument at an agreed upon date for a specified price. The Fund realizes a gain or loss depending on whether the price of an offsetting purchase is less or more than the price of the initial sale or on whether the price of an offsetting sale is more or less than the price of the initial purchase. The Fund could be exposed to risks if it could not close out futures positions because of an illiquid secondary market or the inability of counterparties to meet the terms of their contracts. Futures contracts are valued at the quoted daily settlement prices established by the exchange on which they trade.

The following is a summary of open futures contracts at November 30, 2008:

Fund	Open Contracts	Number of Contracts	Position	Expiration Date	Notional Value	Unrealized Appreciation (Depreciation)
All Cap Core	Russell E-mini 2000 Index Futures	391	Long	Dec 2008	\$18,482,570	(\$5,723,738)

**Swap contracts**

The Fund may enter into interest rate, credit default, cross- currency, and other forms of swap transactions to manage its exposure to credit, currency and interest rate risks or to enhance the Fund's income. Swap agreements are privately negotiated agreements between a Fund and a counterparty to exchange investment cash flows, assets, foreign currencies or market-linked returns at specified, future intervals. In connection with these agreements, the fund will hold cash or identify securities equal to the net amount, if any, of the Fund's obligations with respect to the swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency.

Swaps are marked to market daily based upon values from third party vendors or quotations from market makers to the extent available and the change in value, if any, is recorded as an unrealized appreciation/ depreciation of swap contracts on the Statements of Assets and Liabilities. In the event that market quotations are not readily available or deemed reliable, certain swap agreements may be valued at fair value as determined in good faith by the Trust's Pricing Committee in accordance with procedures adopted by the Board of Trustees.

Upfront payments made/received by the Fund period represent payments to compensate for differences between the stated terms of the swap agreement and prevailing market conditions including credit spreads, currency exchange rates, interest rates, and other relevant factors. The upfront payments are amortized or accreted for financial reporting purposes, with the unamortized/unaccreted portion included in values recorded on the Statements of Assets and Liabilities. A liquidation payment received or made at the termination of the swap is recorded as realized gain or loss on the Statements of Operations. Net periodic payments received or paid by a Fund are included as part of realized gains or losses on the Statements of Operations.

Entering into swap agreements involves, to varying degrees, elements of credit, market and documentation risk in excess of the amounts recognized on the Statements of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform or disagree as to the meaning of contractual terms in the agreements and that there may be unfavorable changes in interest rates. The Fund may also suffer losses if it is unable to terminate outstanding swap contracts or reduce its exposure through offsetting transactions.

**Interest Rate Swap Agreements**

Interest rate swaps represent an agreement between two counterparties to exchange cash flows based on the difference in the two interest rates, applied to the notional principal amount for a specified period. The payment flows are usually netted against each other, with the difference being paid by one party to the other. The Fund settles accrued net receivable or payable under the swap contracts on a periodic basis.

Certain forms of interest rate swap agreements may include: (i) interest rate caps, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates exceed a specified rate, or "cap", (ii) interest rate floors, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates fall below a specified rate, or "floor", (iii) interest rate collars, under which a party sells a cap and purchases a floor or vice versa in an attempt to protect itself against interest rate movements exceeding given minimum or maximum levels, (iv) callable interest rate swaps, under which the counterparty may terminate the swap transaction in whole at zero cost by a predetermined date and time prior to the expiration date, or (v) spreadlocks, which allow the interest rate swap users to lock in the forward differential (or spread) between the interest rate swap rate and a specified benchmark.

The Funds had the following interest rate swap contracts open at November 30, 2008:

Fund	Counterparty	Notional Amount	Currency	Payments Received		Termination Date	Unamortized	Unrealized	Market Value

\* The Fund will receive payment if the floating rate index is above the strike rate. If the floating rate index is below the strike rate, the Fund will pay the counterparty.

### Credit Default Swap Agreements

Credit default swaps (CDS) involve the exchange of a fixed rate premium (paid by "the Buyer") for protection against the loss in value of an underlying debt instrument, referenced entity or index in the event of a defined credit event (such as payment default or bankruptcy). Under the terms of the swap, one party acts as a "guarantor" (the Seller) receiving a periodic payment that is a fixed percentage applied to a notional principal amount. In return, the party agrees to remedies which are specified within the credit default agreement and are dependent on the referenced obligation, entity or credit index. The Fund may enter into CDS in which the Fund may act as the Buyer or Seller. By acting as the Seller, the Fund effectively adds leverage to its portfolio because, in addition to its total net assets, the Fund would be subject to investment exposure on the notional amount of the swap.

If the Fund is the Seller and a credit event occurs, the Fund will either pay to the Buyer the notional amount of the swap and take delivery of the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. If the Fund is The Buyer of protection and a credit event occurs the Fund will either

receive an amount equal to the notional amount of the swap and deliver the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. Recovery values are assumed by market makers considering either industry standard recovery rates or entity specific factors and considerations until a credit event occurs. If a credit event has occurred, the recovery value is determined by a facilitated auction whereby a minimum number of allowable broker bids, together with a specified valuation method, are used to calculate the settlement value.

CDS agreements on corporate issues, sovereign issues of an emerging country and asset-backed securities involve the Buyer making a stream of payments to the Seller in exchange for the right to receive a specified return in the event of a default or other credit event. If a credit event occurs on corporate issues or sovereign issues of an emerging country and cash settlement is not elected, a variety of other deliverable obligations may be delivered in lieu of the specific referenced obligation. The ability to deliver other obligations may result in a cheapest -to-deliver option (the Buyer's right to choose the deliverable obligation with the lowest value following a credit event). Deliverable obligations on CDS on asset-backed securities would be limited to the specific referenced obligation as performance for asset-backed securities can vary across deals. Prepayments, principal paydowns, and other write down or loss events on the underlying mortgage loans will reduce the outstanding principal balance of the referenced obligation. These reductions may be temporary or permanent as defined under the terms of the swap agreement and the notional amount for the swap agreement will be adjusted by corresponding amounts. The Fund may use CDS on these types of securities to provide a measure of protection against defaults of the issuers or to take an active long or short position with respect to the likelihood of a particular issuer's default.

CDS agreements on credit indices involve the Buyer making a stream of payments to the seller in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising the credit index. A credit index is a list of a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. These indices are made up of reference credits that are judged by a poll of dealers to be the most liquid entities in the CDS market based on the sector of the index. Components of the indices may include, but are not limited to, investment grade securities, high yield securities, asset backed securities, emerging markets, and/or various credit ratings within each sector. Credit indices are traded using CDS with standardized terms including a fixed spread and standard maturity dates. An index CDS references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index. The composition of the indices changes periodically, usually every six months, and for most indices, each name has an equal weight in the index. The Fund may use CDS on credit indices to hedge a portfolio of CDS or bonds with a CDS on indices which is less expensive than it would be to buy many CDS to achieve a similar effect. CDS on indices are benchmarks for protecting investors owning bonds against default, and traders use them to speculate on changes in credit quality.

Implied credit spreads, represented in absolute terms, utilized in determining the market value of CDS agreements on corporate issues or sovereign issues of an emerging country as of period end are disclosed in the footnotes to the Schedules of Investments and serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. For CDS agreements on asset-backed securities and credit indices, the quoted market prices and resulting values serve as the indicator of the current status of the payment/performance risk. Wider credit spreads and increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

The maximum potential amount of future payments (undiscounted) that the Fund as the Seller could be required to make under a CDS agreement would be an amount equal to the notional amount of the agreement. Notional amounts of all CDS agreements outstanding as of November 30, 2008 for which the Fund is the Seller are disclosed in the table below. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection CDS agreements entered into by the Fund for the same referenced entity or entities.

The Funds had the following credit default swap contracts open at November 30, 2008:

Fund	Reference Obligation	Issuer	Notional Amount	Currency	Buy/Sell	Protection †	(Pay)/Received Fixed Rate	Maturity Date	Implied Credit			Market Value

AUD	Australian Dollar
BRL	Brazilian Real
CAD	Canadian Dollar
ERU	European Currency
GBP	British Pound
JPY	Japanese Yen
MXN	Mexican Peso
USD	U.S. Dollar

(1) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

(2) The maximum potential amount the Fund could be required to make as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

(3) Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap agreements on corporate issues or sovereign issues of an emerging country as of period end serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

(4) The quoted market prices and resulting values for credit default swap agreements on asset-backed securities and credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative should the notional amount of the swap agreement be closed/sold as of the period end. Increasing market values, in

absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

n/a - Implied credit spreads, as an indicator of the current status of the payment/performance risk only applies to swap contract where the Fund is the seller of protection on corporate issues or sovereign issue of an emerging country.

**Forward Foreign Currency Contracts** All Funds may purchase and sell forward foreign currency contracts in order to hedge a specific transaction or Fund position. Forward foreign currency contracts are valued at forward foreign currency exchange rates and marked to market daily. Net realized gains (losses) on foreign currency and forward foreign currency contracts include net gains or losses realized by a Fund on contracts that have matured.

The net U.S. dollar value of foreign currency underlying all contractual commitments held at the end of the period, the resulting net unrealized appreciation (depreciation) and related net receivable or payable amounts are determined using forward foreign currency exchange rates supplied by a quotation service. The Funds could be exposed to additional risks if the counterparties to the contracts are unable to meet the terms of their contracts or if the value of the forward foreign currency contract changes unfavorably.

At November 30, 2008, certain Funds entered into forward foreign currency contracts, which contractually obligate the Funds to deliver currencies at future dates. Open forward foreign currency contracts at November 30, 2008, were as follows:

Fund	Currency	Principal Amount Covered by Contract	Settlement Date	Unrealized Appreciation (Depreciation)
<b>Global Bond</b>	<b>Buys</b>			
	Australian Dollar	1,395,000	1/15/09	\$11,410

**Forward Commitments** All Funds may purchase or sell debt securities on a when issued or forward delivery basis, which means that the obligations will be delivered to the Funds at a future date, which may be a month or more after the date of commitment. The price of the underlying securities and the date when the securities will be delivered and paid for are fixed at the time the transaction is negotiated.

In a TBA transaction, the Fund commits to purchasing or selling securities for which all specific information is not yet known at the time of the trade, particularly the face amount and maturity date of the underlying security transactions. Securities purchased on a TBA basis are not settled until delivered to the Fund, normally 15 to 45 days later. In general the securities convert to a real pool at settlement.

The Fund may receive compensation for interest forgone in the purchase of forward delivery securities. With respect to purchase commitments, each Fund identifies securities as segregated in its records with a value at least equal to the amount of the commitment. Losses may arise due to changes in the value of the underlying securities, or if the counterparty does not perform under the contract, or if the issuer does not issue the securities due to political, economic or other factors. The value of the securities underlying a forward commitment to purchase securities, and the subsequent fluctuations in their value, are taken into account when determining the Fund's net asset value starting on the day the Fund agrees to purchase the securities. The market values of the securities purchased on a forward delivery basis are identified in the Portfolio of Investments.

**Bond Forward** A forward contract is a contractual agreement made directly between two parties to buy or sell an underlying asset, usually a government bond, at an agreed-upon price and date in the future. The agreed-upon date is called the settlement date. The agreed upon price, which is set at the start of the agreement, is called the forward price. The forward price is also the price at which the forward contract will settle. In a forward transaction, no cash changes hands up-front. If the transaction is collateralized, exchange of margin will take place according to an agreed-upon schedule. Otherwise, no asset of any kind changes hands until the maturity of the contract. Consequently, counterparty credit risk can accumulate over the life of the contract. However, because no cash changes hands up-front, the amount of counterparty credit risk is limited to the mark-to-market profit of the contract, rather than the contract's full notional value. Forward contracts trade in the over-the-counter market in the same way physical bonds trade, and liquidity is typically identical to the underlying physical bond on which the forward contract is based.

The Fund had the following bond forward contracts open at November 30, 2008:

Fund	Description		Principal Amount	Settlement Date	Value at Trade Date	Value At 11/30/08	Unrealized Appreciation (Depreciation)
<b>Investment Quality Bond</b>							
	Federal Republic of Germany 4.25% due 7/4/2018	EUR	4,450,000	12/15/08	\$5,951,291	\$6,194,293	\$243,002
	Government of United Kingdom 5.00% due 3/17/2018	GBP	3,900,000	12/18/08	6,310,630	6,488,855	178,225
	US Treasury Note 4.75% due 8/15/2017	USD	(7,300,000)	12/15/08	(8,151,495)	(8,447,536)	(296,041)

**Investment in Affiliated Underlying Funds** Franklin Templeton Founding Allocation Portfolio, Index Allocation Portfolio and the Lifestyle Portfolios invest primarily in affiliated underlying funds that are managed by affiliates of the Adviser. The Portfolios do not invest in the affiliated underlying funds for the purpose of exercising management or control; however, the Portfolio's investment may represent a significant portion of each underlying fund's net assets. For the period ended November 30, 2008, the Absolute Return Portfolio did not hold 5% or more of any of the underlying Funds' net assets.

REIT - Real Estate Investment Trust

The accompanying notes are an integral part of the financial statements.

## Notes to the Schedule of Investments (Unaudited)

### Security valuation

The net asset value of the Fund is determined daily as of the close of the New York Stock Exchange (NYSE), normally at 4:00 p.m., Eastern Time. Short-term debt investments that have a remaining maturity of 60 days or less are valued at amortized cost, and thereafter assume a constant amortization to maturity of any discount or premium, which approximates market value. All other securities held by the Fund are valued at the last sale price or official closing price (closing bid price or last evaluated quote if no sale has occurred) as of the close of business on the principal securities exchange (domestic or foreign) on which they trade or, lacking any sales, at the closing bid price. Securities traded only in the over-the-counter market are valued at the last bid price quoted by brokers making markets in the securities at the close of trading. Securities for which there are no such quotations, principally debt securities, are valued based on the evaluated prices provided by an independent pricing service, which utilizes both dealer-supplied and electronic data processing techniques, which take into account factors such as institutional-size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data. Investments in John Hancock Cash Investment Trust (JHCIT), an affiliate of John Hancock Advisers, LLC (the Adviser), a wholly owned subsidiary of John Hancock Financial Services, Inc., a subsidiary of Manulife Financial Corporation, are valued at their net asset value each business day.

Other portfolio securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith by the Trust's Pricing Committee in accordance with procedures adopted by the Board of Trustees. Generally, trading in non-U.S. securities is substantially completed each day at various times prior to the close of trading on the NYSE. The values of such securities used in computing the net asset value of the Fund's shares are generally determined as of such times. Occasionally, significant events that affect the values of such securities may occur between the times at which such values are generally determined and the close of the NYSE. Upon such an occurrence, these securities will be valued at fair value as determined in good faith under consistently applied procedures established by and under the general supervision of the Board of Trustees. Debt securities whose prices cannot be provided by an independent pricing service are valued at prices provided by broker-dealers.

Valuations change in response to many factors including the historical and prospective earnings of the issuer, the value of the issuer's assets, general economic conditions, interest rates, investor perceptions and market liquidity.

The Fund adopted Statement of Financial Accounting Standards No. 157 (FAS 157), *Fair Value Measurements*, effective with the beginning of the Fund's fiscal year. FAS 157 established a three-tier hierarchy to prioritize the assumptions, referred to as inputs, used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below:

Level 1 - Quoted prices in active markets for identical securities.

Level 2 - Prices determined using other significant observable inputs. Observable inputs are inputs that other market participants would use in pricing a security. These may include quoted prices for similar securities, interest rates, prepayment speeds, credit risk and others.

Level 3 - Prices determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable, such as when there is little or no market activity for an investment, unobservable inputs may be used. Unobservable inputs reflect the Fund's own assumptions about the factors that market participants would use in pricing an investment and would be based on the best information available.

---

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value the Fund's net assets as of November 30, 2008:

Valuation Inputs	Investments in Securities	Other Financial Instruments*
Level 1 - Quoted Prices	\$375,782,626	-
Level 2 - Other Significant Observable Inputs	12,565,000	-
Level 3 - Significant Unobservable Inputs	-	-
Total	\$388,347,626	-

\* Other financial instruments are derivative instruments not reflected in the Portfolio of Investments, such as futures, forwards and swap contracts, which are valued at the unrealized appreciation/depreciation on the instrument.

### Federal income tax cost

At November 30, 2008, the aggregate cost of investment securities for federal income tax purposes was \$467,236,284. Net unrealized depreciation aggregated \$78,888,658, of which \$11,750,532 related to appreciated investment securities and \$90,639,190 related to depreciated investment securities.

### Repurchase agreements

Pursuant to an exemptive order issued by the SEC, the Fund, along with other registered investment companies having a management contract with the Adviser, may participate in a joint repurchase agreement transaction. Aggregate cash balances are invested in one or more large repurchase agreements, whose underlying securities are obligations of the U.S. government and/or its agencies. The Fund's custodian bank receives delivery of the underlying securities for the joint account on the Fund's behalf. When a Fund enters into a repurchase agreement, it receives delivery of collateral, the amount of which at the time of purchase and each subsequent business day is required to be maintained at such a level that the value is generally 102% of the repurchase amount.

### Securities lending

The Fund may lend portfolio securities from time to time in order to earn additional income. The Fund retains beneficial ownership of the securities it has loaned and continues to receive interest and dividends paid by the issuer of securities and to participate in any changes in their value. On the settlement date of the loan, the Fund receives cash collateral against the loaned securities and maintain the cash collateral in an amount not less than 102% of the market value of the loaned securities for U.S. equity and corporate securities and 105% for foreign equity and corporate securities during the period of the loan. The market value of the loaned securities is determined at the close of business of the Fund and any additional required cash collateral is delivered to the Fund on the next business day. Cash collateral received is invested in the JHCIT. The Fund may receive compensation for lending their securities either in the form of fees, guarantees, and/or by retaining a portion of interest on the investment of any cash received as collateral. If the borrower defaults on its obligation to return the securities loaned because of insolvency or other reasons, the Fund could experience delays and costs in recovering the securities loaned or in gaining access to the collateral. The Fund bears the risk in the event that invested collateral is not sufficient to meet obligations due on loans.

## Risk and Uncertainties

### Concentration risk

The Funds may concentrate investments in a particular industry, sector of the economy or invest in a limited number of companies. Accordingly, the concentration may make the Fund's value

more volatile and investment values may rise and fall more rapidly. In addition, a fund with a concentration is particularly susceptible to the impact of market, economic, regulatory and other factors affecting the specific concentration.

### Sector risk – financial industry

Fund performance will be closely tied to a single sector of the economy, which may underperform other sectors over any given period of time. Financial services companies can be hurt by economic declines, changes in interest rates, regulatory and market impacts. Accordingly, the concentration may make the Fund's value more volatile and investment values may rise and fall more rapidly.

## Item 2. Controls and Procedures.

(a) The Registrant's principal executive and principal financial officers have concluded, based upon their evaluation of the Registrant's disclosure controls and procedures as of a date within 90 days of the filing date of this report, that the Registrant's disclosure controls and procedures are reasonably designed to ensure that information required to be disclosed by the Registrant on Form N-Q is recorded, processed, summarized and reported within the required time periods and that information required to be disclosed by the Registrant in the reports that it files or

submits on form N-Q is accumulated and communicated to the Registrant's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

(b) There were no changes to the Registrant's internal control over financial reporting that occurred during the Registrant's most recently ended fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Registrant's internal control over financial reporting.

**Item 3. Exhibits.**

(a) Certifications of principal executive and principal financial officers as required by Rule 30a-2(a) under the Investment Company Act of 1940 are attached hereto as EX-99.CERT.

---

**SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Registrant: John Hancock Funds II

## CERTIFICATIONS

I, Keith F. Hartstein, certify that:

1. I have reviewed this report on Form N-Q of John Hancock Funds II;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the schedules of investments included in this report fairly present in all material respects the investments of the registrant as of the end of the fiscal quarter for which the report is filed;
4. The registrant' s other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940) and internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant' s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of a date within 90 days prior to the filing date of this report, based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant' s internal control over financial reporting that occurred during the registrant' s most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant' s internal control over financial reporting; and
5. The registrant' s other certifying officer(s) and I have disclosed to the registrant' s auditors and the audit committee of the registrant' s board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant' s ability to record, process, summarize, and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant' s internal control over financial reporting.
