NOTA:

Las denominaciones empleadas en las publicaciones de la OMM y la forma en que aparecen presentados los datos que contienen no entrañan, de parte de la Secretaría de la Organización, juicio alguno sobre la condición jurídica de ninguno de los países, territorios, ciudades o zonas citados o de sus autoridades, ni respecto de la delimitación de sus fronteras o límites.

Las opiniones expresadas en las publicaciones de la OMM son las de los autores y no reflejan necesariamente las de la Organización. La mención de determinados productos o sociedades mercantiles no implica que la OMM los favorezca o recomiende con preferencia a otros análogos que no se mencionan ni se anuncian.

1. GENERAL

This Volume contains the Catalogue of Meteorological Bulletins which gives for each compiling or editing centre of the Global Telecommunication System the list of meteorological bulletins being transmitted for global, inter-regional and regional exchanges. An abbreviated heading (TTAAii CCCC) uniquely identifies each bulletin.

Full details as regards abbreviated headings are contained in WMO Publication No. 386 - *Manual on the Global Telecommunication System - Volume I - Part II paragraph 2.3.2*. The allocation of WMO standard data designators (TTAAii) is given in Attachment II-5 of the above publication. The list of international four-letter location indicators (CCCC) is given in Annex I to this introduction.

2. ARRANGEMENT OF MATERIAL

The material in the Catalogue is arranged in two parts: Part A and Part B.

2.1 Part A

Part A includes all the bulletins excluding GRIB and GRID bulletins (see paragraph 2.2). This first part includes seven sections corresponding to the six regions of the World Meteorological Organization and to the Antarctic. Each of the six regional sections begins with a table showing the Regional Telecommunication Hubs (RTHs) in the Region and the countries included in their respective zones of responsibility.

The zones of responsibility of the RTHs are described in the WMO Publication No. 386 - *Manual on the Global Telecommunication System – Volume II – Regional aspects – Regions I, II, III, IV, V and VI* - paragraphs 3.4.

Countries are listed in English alphabetical order within the zone of responsibility of the RTHs. The same country order is followed in the lists of meteorological bulletins for different centres, which are arranged by countries within the zone of responsibility of the RTH. When a country is in the zone of responsibility of several RTHs, the list of the bulletins for this country appears only once under one of the associated RTHs.

A different arrangement is followed for the Antarctic section where the lists of bulletins are given in the alphabetical order of the compiling or editing centre within the region in which the centre is located.

2.2 Part B

Part B includes the GRIB and GRID bulletins for which the first letter of the abbreviated headings (TTAAii CCCC) is D, G, H, O, X or Y. The bulletins are presented in the order of the Regions, RTHs, countries and location indicators of the centres.

3. PRESENTATION OF PART A

3.1 Layout of the Lists of Bulletins

Each list starts with the name of the country and the name of the compiling or editing centre. The date given at the top of the page of the list is either that of entry into force or the date when the information has been supplied to the Secretariat. The information concerning each bulletin is presented in columns in the following manner:

Abbreviated heading	Code form used	Time group used	Content of bulletin	Remarks
TTAAii CCCC		(GG)		

3.2 Abbreviated Heading

This column shows for each bulletin the groups TTAAii CCCC.

3.3 Code Form Used

This column indicates the FM code number used in accordance with the FM code system prescribed in WMO Publication No. 306 - *Manual on Codes*. The indication PLAIN LANGUAGE is given for those bulletins, which are not in coded form.

3.4 Time Group (GG)

This column indicates the following:

- (a) For bulletins containing meteorological reports intended for standard time of observations, the standard time of observation in UTC;
- (b) For aerodrome, route and area (aeronautical) forecasts: the full hour in UTC preceding the transmission time; for other forecasts and analyses: standard time of observation in UTC on which the forecast or analysis is based;
- (c) For other messages the time of compilation in UTC.

3.5 Content of Bulletin and Remarks

The column "Content" gives, as appropriate, the international index numbers or the international four-letter location indicators of the stations whose reports are included in the bulletin. The indications - SHIP/NAVIRE, AIREP and CODAR are used when appropriate in the column "Remarks". Other remarks are also given, if necessary.

4. PRESENTATION OF PART B

Each list starts with the number of the Region, the name of the country and the name of editing centre. The date given at the top of the page of the list is either that of entry into force or the date when the information has been supplied to the Secretariat. The columns contain the abbreviated headings and the time groups relevant to the bulletins.

CCCC
TTAAii Time Group

1. GÉNÉRALITÉS

Le présent volume contient le Catalogue des bulletins météorologiques. Il donne, pour chaque centre du système mondial de télécommunications qui établit ou compose les bulletins, la liste des bulletins météorologiques transmis aux fins d'échanges mondiaux, interrégionaux et régionaux. Chaque bulletin est identifié par un en-tête abrégé (TTAAii CCCC).

On trouvera des renseignements complets sur les en-têtes abrégés dans la Publication OMM N° 386 - *Manuel du système mondial de télécommunications - Volume I - Partie II - paragraphe 2.3.2*. Les indicateurs de données (TTAAii) de l'OMM figurent dans le Supplément II-5 de la publication susmentionnée. La liste des indicateurs d'emplacement internationaux en quatre lettres (CCCC) figure dans l'Annexe I à la présente introduction.

2. DISPOSITION DES RENSEIGNEMENTS CONTENUS DANS LE CATALOGUE

Les renseignements contenus dans le Catalogue sont disposés en deux parties: Partie A et Partie B.

2.1 Partie A

La Partie A contient tous les bulletins à l'exclusion des bulletins GRIB et GRID (voir paragraphe 2.2). Les renseignements contenus dans cette partie sont disposés en sept sections correspondant aux six Régions de l'Organisation météorologique mondiale et à l'Antarctique. Chacune des six sections régionales débute par un tableau indiquant les Centres Régionaux de Télécommunications (CRT) de la Région et les pays compris dans leurs zones de responsabilité respectives

Les zones de responsabilité des CRT sont décrites dans la Publication OMM N° 386 - *Manuel du système mondial de télécommunications - Volume II - Aspects Régionaux - Régions I, II, III, IV, V et VI - paragraphes 3.4*.

Pour chaque CRT, les pays sont présentés dans l'ordre alphabétique anglais. Les listes des bulletins météorologiques des différents centres sont également données par pays, ceux-ci étant classés sous chaque CRT selon le système qui vient d'être indiqué. Dans le cas où un pays se trouve dans la zone de responsabilité de plusieurs CRT, la liste des bulletins pour ce pays n'apparaît qu'une seule fois sous un des CRT.

Un arrangement différent a été adopté pour la section relative à l'Antarctique; dans cette section, les listes de bulletins sont données pour chacun des centres qui établissent ou composent ces bulletins, ces centres étant classés par Région, dans l'ordre alphabétique à l'intérieur de chaque Région.

2.2 Partie B

La Partie B contient les bulletins GRIB et GRID pour lesquels la première lettre de l'en-tête abrégé (TTAAii CCCC) est D, G, H, O, X ou Y. Les bulletins sont présentés dans l'ordre des Régions, CRT, pays et les indicateurs d'emplacement du centre.

3. PRESENTATION DE LA PARTIE A

3.1 Présentation des Listes de Bulletins

Chaque liste débute par le nom du pays et par le nom du centre qui établit ou compose le bulletin. La date figurant en haut de la page de la liste des bulletins est soit la date d'entrée en vigueur de la liste, soit la date à laquelle les renseignements ont été communiqués au Secrétariat. Les renseignements concernant chaque bulletin sont présentés dans des colonnes, de la manière suivante:

En-tête abrégé TTAAii	Forme symbolique Utilisée	Groupe horaire (GG)	Contenu du bulletin	Remarques
--------------------------	------------------------------	------------------------	---------------------	-----------

3.2 En-tête abrégé

Cette colonne indique pour chaque bulletin les groupes TTAAii CCCC.

3.3 Forme symbolique utilisée

Cette colonne indique le numéro FM de la forme symbolique utilisée, conformément au système des formes symboliques FM défini dans la Publication OMM N° 306 - *Manuel des Codes*. Les bulletins qui ne sont pas présentés sous forme chiffrée sont signalés par la mention "PLAIN LANGUAGE" (langage clair).

3.4 Groupe horaire (GG)

Cette colonne indique:

- (a) Pour les bulletins contenant des messages d'observation météorologique correspondant aux heures standard d'observation, l'heure standard de l'observation en heure UTC;
- (b) Pour les messages de prévisions d'aérodrome, de route et de zone (pour l'aviation), l'heure ronde UTC précédant l'heure de transmission; pour les autres messages de prévision et d'analyse, l'heure standard, en heure UTC, de l'observation ayant servi de base à la prévision ou à l'analyse;
- (c) Pour les autres messages, l'heure de rédaction en heure UTC.

3.5 Contenu du bulletin et remarques

La colonne "Content" (contenu) indique, selon le cas, les chiffres indicatifs internationaux ou les indicateurs d'emplacement internationaux en quatre lettres des stations dont les messages d'observation sont inclus dans le bulletin. Les indications SHIP/NAVIRE, AIREP et CODAR sont employées lorsqu'il y a lieu. Dans la colonne "Remarks" (Remarques) d'autres remarques sont ajoutées en cas de besoin.

4. PRESENTATION DE LA PARTIE B

4.1 Présentation des Listes de Bulletins

Chaque liste débute par le numéro de la Région, par le nom du pays et par le nom du centre. La date figurant en haut de la page de la liste des bulletins est soit la date d'entrée en vigueur de la liste, soit la date à laquelle les renseignements ont été communiqués au Secrétariat. Les renseignements sont présentés en colonnes, pour chaque bulletin les en-têtes abrégées et le groupe horaire de la manière suivante:

CCCC	
TTAAii	Groupe Horaire

1. ОБЩИЕ ЗАМЕЧАНИЯ

Этот том содержит каталог метеорологических бюллетеней, в котором приводятся метеорологические бюллетени для каждого центра Глобальной системы телесвязи, составляющего или редактирующего бюллетени для глобального, межрегионального и регионального обмена. Каждый бюллетень имеет сокращенный заголовок (ТТААи СССС).

2. РАСПОЛОЖЕНИЕ МАТЕРИАЛА

Материал в каталоге расположен в семи разделах, соответствующих шести регионам Всемирной Метеорологической Организации и Атлантике. Каждый из шести региональных разделов начинается с таблицы, указывающей региональные узлы телесвязи (РУТ) в Регионе, и страны, включенной соответственно в их зоны ответственности. Страны перечислены в порядке букв английского алфавита в пределах зоны ответственности РУТ, за исключением страны РУТ, которая указана первой. Тот же порядок принят для бюллетеней различных центров, которые расположены в алфавитном порядке стран в пределах зоны ответственности РУТ.

Несколько иной порядок расположения материала в разделе Антарктика, где перечень бюллетеней дается в алфавитном порядке центров, составляющих или редактирующих информацию в пределах региона, в котором расположен центр.

3. ПОСТРОЕНИЕ ПЕРЕЧНЕЙ БЮЛЛЕТЕНЕЙ

Каждый перечень начинается с названия страны и наименования центра, составляющего или редактирующего информацию. Когда речь идет о РУТ, указывается также зона ответственности. Дата, проставленная в верхней части первой страницы, указывает, когда документ входит в силу, либо, когда эта информация получена Секретариатом. Информация о каждом бюллетене представлена по колонкам следующим образом:

Сокращенный заголовок		Форма используемого кода	Группа времени (GG)	Содержание бюллетеня и замечания
ТТААи	СССС			

3.1 Сокращенный заголовок

Эта колонка указывает для каждого бюллетеня группы ТТААи СССС. Подробности, касающиеся сокращенных заголовков, содержатся в пункте 2.3.2 части II тома I Публикации ВМО № 386 – Наставление по Глобальной системе телесвязи. Стандартные указатели данных ВМО (ТТ) и географические указатели (АА) содержатся в приложении П-5 вышеуказанной Публикации. Перечень международных четырехбуквенных указателей местоположения (СССС) содержится в приложении I введения к тому С1.

ВВЕДЕНИЕ

3.2 Форма используемого кода

Эта колонка указывает номер используемого кода FM в соответствии с кодовой системой FM, описанной в Публикации ВМО № 306 – Наставление по кодам. Указание ОТКРЫТЫЙ ТЕКСТ дается для тех бюллетеней, которые не являются кодированными.

3.3 Группа времени (GG)

В этой колонке указывается следующее:

- a) для бюллетеней, содержащих метеорологические сводки, стандартное время наблюдения по СГВ;
- b) для прогнозов по аэродрому, маршруту и району (авиационному) – полный час по СГВ, предшествующий сроку передачи; для других прогнозов – стандартное время наблюдения по СГВ, на котором базируется прогноз или анализ;
- c) для других сообщений время составления по СГВ.

3.4 Содержание бюллетеня и замечания:

Эта колонка указывает, если необходимо, международный индекс или международный четырехбуквенный указатель географического местоположения станций, сводки которых включены в бюллетень. Указатели – SHIP/NAVIRE, AIREP и CODAR также используются при необходимости. Даются также другие замечания, если необходимо.

1. GENERALIDADES

Este volumen contiene el Catálogo de los Boletines Meteorológicos en el que figura, para cada uno de los centros del Sistema Mundial de Telecomunicación que edita o prepara el boletín, la lista de los boletines meteorológicos que se transmiten a nivel mundial, interregional o regional. Cada boletín se identifica específicamente mediante un encabezamiento abreviado (TTAAii CCCC).

2. PRESENTACION DE LA INFORMATION

El contenido de este Catálogo comprende siete secciones que corresponden a las seis Regiones de la OMM y al Antártico. Cada una de esas seis secciones regionales van encabezadas por una tabla en la que figuran los Centros Regionales de Telecomunicaciones (CRT) de la Región y los países enclavados en las zonas de responsabilidad de esos centros.

Los países se han clasificado, bajo cada CRT correspondiente, en el orden alfabético inglés, excepto en lo que respecta al país en que se halla implantado el CRT, que figura en primer lugar. Se sigue el mismo orden alfabético por países para las listas de boletines meteorológicos de los diferentes centros, que van ordenados por países dentro de la zona de responsabilidad del CRT.

Para la sección del Antártico se sigue una disposición diferente, ya que las listas de boletines figuran por orden alfabético del centro que edita o prepara el boletín dentro de la Región en que se encuentra ubicado el centro.

3. PRESENTACION DE LAS LISTAS DE BOLETINES

Cada lista empieza con el nombre del país y el nombre del centro que edita o prepara el boletín. En el caso de los CRT, también se indica la zona de responsabilidad. La fecha que figura en la parte superior de la página de la lista es, o bien la de entrada en vigor, o bien la fecha en que se facilitó la información a la Secretaría. La información relativa a cada boletín se presenta en columnas, como sigue:

Encabezamiento abreviado		Clave simbólica utilizada	Grupo horario	Contenido del boletín y comentarios
TTAAii	CCCC			

3.1 ENCABEZAMIENTO ABREVIADO

En esta columna figuran, para cada boletín, los grupos TTAAii CCCC. En el párrafo 2.3.2 de la Parte II del Volumen I de la Publicación de la OMM N° 386 - *Manual del Sistema Mundial de Telecomunicación* - figura información detallada sobre los encabezamientos abreviados. En el Adjunto II-5 de la citada publicación figuran los indicativos de datos (TT), los indicativos geográficos (AA) y los indicativos de nivel (ii) normalizados. En el Anexo I a la introducción al Volumen C1 figura la lista de indicativos internacionales de emplazamiento de cuatro letras (CCCC).

3.1 CLAVE SIMBOLICA UTILIZADA

En esta columna se indica el número FM de la clave simbólica utilizada, conforme al sistema de claves simbólicas FM descrito en la Publicación de la OMM N° 306 - *Manual de Claves*. La indicación PLAIN LANGUAGE se utiliza para todos aquellos boletines que no hayan sido cifrados en clave.

3.2 GRUPO HORARIO (GG)

Esta columna indica:

- (a) Para los boletines que contienen informes meteorológicos, la hora fija de observación UTC;
- (b) Para los mensajes de predicción de aeródromo, de ruta o de zona (para la aviación): la hora entera UTC que precede a la hora de transmisión; para otros mensajes de predicción y análisis; la hora fija de observación UTC en que se basa la predicción o el análisis;
- (c) Para otros mensajes, la hora de origen UTC.

3.3 CONTENIDO DEL BOLETIN Y COMENTARIOS

En esta columna figuran, según convenga, los indicativos internacionales o los indicativos de emplazamiento internacionales de cuatro letras relativos a las estaciones cuyos mensajes figuran en el boletín. Las indicaciones SHIP/NAVIRE, AIREP y CODAR también se utilizan, cuando conviene, formulándose también otros comentarios, cuando procede.
