The purpose of the meeting was to have a conference with the parties that were nominated at the mass meeting held Sept 25th 1909, those present were J.L.Gay, J.W.Dinsmore, A.Isaacs, J.K.Baker, F.W.Fowler and G.D.Holiday.

The question of accepting the proposition of the College was taken up and discussed, they offering to give one hundred dollars and then pay one half of the expense of rebuilding the street beginning at Elisee St and running East on Chestnut and Main to Spring and Prospect Sts.

Mr. Dinsmore thought that it was an exceptionally good offer and that the board ought to accept it but the most of the members seemed to think that there were places in town where they should expend the tax money first deeming it best to repair the street in front of property of those persons who paid taxes into the town treasury and then if there was any money left that they might do some work in front of the college property but at present to only do such repair work as was absolutely nessiary on this part of the street. Messers Baker and Burdett thinking that the town should not doo any work at all on this portion of the street but that the college should do it entirly by themselves as they are exempt from taxation and own all the property on both sides of the street at this point.

Wilson who had refused to list with the assessor and he also refused to give a list to the Board claiming that his property was not inside the city limits but the fact being established that his property was within the city limits a new summons was issued asking him why he should not list his property for \$1000.00 and also list cash and notes at \$3000.00 or more also why he should not list for the past four years.

Adjourned to meet Tues. Dec. 14 1909.

Berea, Ky., Dec. 14 1909.

The Board of Equalization meet in the directors room of The Berea Bank and Trust Co. at nine thirty all the members prese

There being no witnesses in waiting the lists of those summoned and who did not appear were taken up and passed on a list of which appears later in this report.

It was found that Mr L.V.Dodge had notes or papers in his possession amounting to \$4760 of which he only listed \$1800 both for the year 1909 and 1910 so the clerk was instructed to issue a summons for him to appear before the board at a meeting to be held Jan. 10 1910 and show why he should not list this amount for both years referred to.

The clerk was instructed to issue summonses for five additional persons to appear before the board on Jan. 10 1910 after which they adjourned.

Berea, Ky., Jan 10 1910.

The Board of Equalization meet in the directors room of The Berea Bank and Trust Co. at nine A.M. with all the members present.

Mr. J.S.Wilson was in waiting and after some talk he still refused to give a list for the year 1910 and also said that this present board had no right to inquire into the matter of back tax and so refused at first make any statement whatever but upon being questioned in answer to a question asked by Mr W.H.Porter as to how much of his property was within the City Limits he stated that he thought that about one third or perhaps one half of it might be inside the limets

Mr. L.V.Dodge being unable to attend the meeting wrote to them stating that he had listed all of his taxable property for the year 1909 and if he had any thing more that was taxable he did not know what it was.

After some consideration in regard to the back taxes of both Mr J.S.Wilson and Mr L.V.Dodge it was decided to make the following report to the City Council.

"We the Board of Equalization of the City of Berea, Ky. in session for the year 1910 find that Mr J.S.Wilson has not listed his property in fact has refused to list it for several years and knowing that this property is within the City Limits and that Mr Wilson has not listed so as to evade paying the City what taxes would be due them on this property we recomend that the City Council proceed to make an assessment against this property for the years 1906, 1907, 1908 and 1909. also that they take some action against Mr Wilson for his refusal to give a list on this property. We also upon investigation find that Mr L.V. Dodge failed to give in for taxation some papers showing that a sale of his property had been made to Berea College but he claimed that these papers were not in the form of notes and bore no intrest and that he ought not to have to pay any taxes on this but admitted that he could cash in this paper at almost any bank if he chose to so we recomend that the City Council proceed to make an assessment against Mr Dodge for this item which amounts to \$2960 more than he listed for the year 1909."

Following is a tabulated form of all persons whose property was raised and the amount of the raise.

F.E.Matheney presented a petition signed by himself, Chas.B.Lindsley, Sarah S.Dager, I.L.McLaren and A.N.May. asking that the Council amend their action regarding board sidewalks on Estill Street (as it would delay a better walk for many years to come) and to order cement walks in the spring of 1911. Mr.T.J.Osborne was present representing the College, and presented the following petition.

The Mayor and Council of Berea, Ky.

Gentlemen:-

As a representative of the College, I wish to respectfully urge the reconsideration of the ordinance requiring board walks on Estill street.

Such a walk is exceedingly expensive for the service it renders, and when built, is not what anyone really wants.

If the Council shall see fit to repeal this ordinance, or substitute for it, one requiring the immediate repair of the bad places with cinders and rock screenings, and the construction of a permanent concrete walk next spring, it would meet the hearty approval of the College authorities.

I am authorized to assure the Council that the College will do its part in accordance with the above suggestions, if an ordinance of that nature shall be passed.

Very respectfully,

(Signed) Thos.J.Osborne.

Chas Preston appeared before the Council and asked that as the ordinance requiring concrete walks on Richmond street had not been complied with, that the Council have a side walk of some character extended down Estill street to Forest street in order that people who live on the north end of this street may have side walks to reach the business section of the city.

(d) Holliday shall be given access to the premises of any consumer at all times in order to inspect and repair any connections, fixtures or meter, and he shall have the right to disconnect the service of any consumer at any time for a violation of his rules and regulations.

...the great advance in improved roads has been coincident with the coming and the development of the automobile. Every new automobile that is manufactured means at least one new and enthusiastic advocate of better roads. The local, state and federal authorities have joined in the movement, and as a consequence we are able to record figures which tell a most impressive story. And, while the automobilists have been the chief factor in stimulating this desire for modern and first class roads, they have not been the only beneficiaries of the movement. All of the people have profited, and most of all the farmers, who have thus been enabled to find an easy and convenient method of marketing their products. The good roads have also aided in the extension of the rural free delivery service of the postoffice department, and this has been of inestimable benefit to those far removed from the large centers of population.

Activity In Illinois.

Distribution has been made of the Illinois state automobile fund for 1916-17. Nearly a million dollars was distributed to the various counties of the state by the state highway commission. The exact amount is \$990,000. This is the amount appropriated for the year 1916-17 by the last general assembly, and it was contributed by the automobilists of the state in licenses.

Inasmuch as each county must appropriate a similar amount in order to get the money the allotment means that \$2,000,000 will be spent on the roads of the state this fall and next spring besides the thousands spent by counties which have voted bond issues.

the powers of production, distribution, education and government by collecting \$140 by the modest contribution of 4 cents each week. Three collectors were appointed to visit the members every Sunday and they would probably have to walk altogether twenty miles each week to get the money." The details may sound trivial and incidental. They are mentioned as indicative of the determination and spirit of mutual help at the cost of personal sacrifice, which is one of the features essential to the success of the co-operative movement.

While the twenty-eight co-operators in Rochdale in 1844 took one year to collect \$140 capital, to-day 28,601 co-operators in that town have a capital of \$2,448,865, did a trade in 1911 of \$3,011,070, and made a net profit of \$506,735.

It will be seen, therefore, that to-day there are hundreds, probably thousands, of working men in Rochdale who could go down to their co-operative store and each draw the aggregate amount it took the

trade center in their special lines. And a community may have several special lines, the same breed of horses, of dairy or beef cattle, of poultry, sheep, hogs, and the same variety of corn, of wheat or other crops.

When a buyer wants a carload of dairy cattle he will cross several states to get into a community where he can get the breed of his seeking in car lots. If a buyer wants a choice shipment of grain he will more likely find what he wants in a community where all grow that one variety. It will have greater uniformity than mixed lots and the advantage of being able to select from a whole community is the same advantage that the buyer of shoes has who finds many shoe stores close together.

There is purely local advantage in uniformity of breeds of animals and varieties of crops, which makes it easier to get breeding stock, with no liability of mixing breeds in case stock get together, or mixing varieties of crops by wind or other-

Standing committees no report.

Special committee appointed to investigate telephone franchise continued from February meeting submitted the following report and recommendations:-

- (1) The franchise under which the company is operating provides that, the company shall furnish its service at a reasonable charge, and that there is nothing in the franchise with reference to installation charges.
 - (2) Just prior to the war the company made no charge for installation and only charged \$2.00 for business phones and \$1.25 for residence phones per month. During the war the Government allowed all telephone companies to charge a fee for installation, but this provision is now repealed. . . . The cost of equipment, labor and other expenses has been considerably reduced at the companies since the war and is now back to pre-war basis, nevertheless the telephone company in Berea, has made no reduction in the charge for service etc but have raised same.
 - (3) We find that most all other towns in the State of the same class as Berea have a considerably lower rate than we have and are charged nothing for installation. The only question this committee has or takes into consideration is the reasonableness of the present charges and rates which are \$2.00 for residence phones and \$3.00 for business phones and an installation charge of \$3.50. After careful consideration and comparison we are of the opinion that the present rates are unreasonable and in arriving at this conclusion we have taken into consideration the amount of the company's investment, labor and all expenses in connection with its operation, after which, we recommend the following charges:- \$2.50 for business phones and \$1.50 per month for residence phones no charge for installation or removal, and that the company require every subscriber to pay three months in advance at the time of installing any phone, and that appropriate steps be taken to compel the company to put into effect the charges and conditions just stated. (Signed W.B. Walden and B.P. Allen) committee.
- A Motion was duly made and carried that this committee make a further general investigation and report back next meeting.

Special committee appointed to investigate the need of additional street lights reported and recommended that an additional street light be placed at West Chestnut street, Elder street, Boone street and Jefferson and Ellipse streets.

F.O. Clark made a motion duly seconded that the report of this committee be accepted and the recommendations adopted.

BEREA COLLEGE
AND ALLIED SCHOOLS

BEREA, KENTUCKY

OFFICE OF PRESIDENT

WILLIAM J. HUTCHINS

July 15, 1925

To the Mayor and City Council,
Berea,
Kentucky

Gentlemen:

I have been informed that the City Council have passed a resolution ordering the advertising for bids for the curb and gutter on Estill Street. I sympathize heartily with the Council and the citizens of Berea in their desire to have Estill Street become the most beautiful street in the town, as it should be.

This is the situation: we have taken care of the curb and gutter on Chestnut Street, on Prospect Street, on Depot Street, on a part of Center Street and have done a very considerable amount of work, in the improvement of the street between Ladies Hall and the Main Campus. We have also spent in the past year a great deal of money in beautifying the Campus along Estill Street. I was compelled to present to the Trustees at their June meeting in Berea a budget of expenses for the ensuing year showing a deficit which surprised and staggered them. Of this deficit \$15,000 was accounted for by the necessary installation of an electric generator which we trust will be of benefit to all the citizens of Berea; another \$15,000 of the deficit is accounted for by the installation of an elevated water tank which will also be of the utmost service to all the citizens of Berea, not only in the matter of ordinary water supply but in the matter of protection against fire. The Trustees requested the Prudential Committee to make a drastic cut in the budget for the coming year, and I have been compelled to inform almost every head of every department that he must cut his estimate by fifty percent.

In view of the fact that we are making every possible effort to do our share in the creation of Berea Beautiful and in view of the serious present financial difficulty, I trust that you will be satisfied with the following agreement, viz:

The Prudential Committee hereby agree that immediately after the close of the current fiscal year, June 15, 1926, the College will undertake to do its share toward the curbing and gutter on the north side of Estill Street bounding the College property.

With this assurance I feel confident that the City Council will be agreeable to the postponement of this work. I trust that the postponement may also be agreeable to the Council in view of the necessary expenditure which the city would incur in connection with this improvement.

Sincerely yours

Wm. J. Hutchins
