Grand Pianos

Grand Pianos

Yamaha grand pianos – the choice of many top pianists, and loved by families all around the globe. The superior quality of our pianos reflects leading-edge technology, an advanced design philosophy, and the quality craftsmanship resulting from more than a century of piano-making experience. When designing pianos, Yamaha gives priority to achieving the ultimate in balance, analyzing every factor from the soundboard and strings to the symbiotic relationship between the shape of the soundboard and the positioning of the bridge, to provide each instrument with a superb sound and feel. We give consideration to the optimal configuration for components, manufacturing all the major parts in our pianos, from the small tuning pins to the frame, in our own workshops. Thorough control and meticulous attention to detail mean that our components are always of the highest quality.

Upright Pianos

Bringing a Yamaha upright piano to life requires a subtle blend of art and science. Looking deeply into the heart of the piano for the source of good sound, we design and build these instruments using only the finest materials from around the world. Yamaha craftsmen harness time-honored techniques to create instruments of unsurpassed quality at our state-of-the-art production facilities. Once finished, the instruments are ready to deliver a lifetime of musical pleasure.

disklavier ENSPIRE™

Thousands of Performances In One Masterpiece

The Disklavier ENSPIRE allows you to revel in whatever music suits your mood or occasion, from classical solo piano or concerto selections to your favorite jazz or pop songs on piano – accompanied by audio and vocals. An easy-to-use and intuitive UI design provides direct access to 500 built-in songs and over 6,000 performances that can be downloaded directly to the instrument from the Yamaha MusicSoft online store.

disklavier ENSPIRE™ Disklavier ENSPIRE™ with MusicCast™

Effortless Integration
Wireless network connectivity and seamless compatibility with mobile devices, smartphones and computers allow control wherever you are.

The Sound of Innovation
Yamaha SILENT Piano™ technology allows you to listen, learn and play without being disturbed or disturbing others. This innovative technology is built into every Disklavier ENSPIRE model, giving you increased flexibility and more opportunities to enjoy your piano.

Inspired By Technology, Powered By Performance
Extremely accurate recording functions allow teachers and students to critique recorded performances - providing new ways for students to enhance their musical development.

Digital Pianos

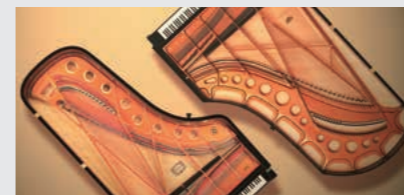

CLP Series

Distilling the very essence of a grand piano into the feel, tone and touch that resonates with the aspiring pianist in you. Play with the Voice of the CFX, Yamaha's finest concert grand piano

- The Clavinova CLP Series also offers the unique sound of a Bösendorfer grand.
- Experience the sound, keyboard touch and pedal feel of a grand piano.
- A full range of functions for use when practicing.

CLP-700 Series

Two world-renowned concert grand pianos in one
The powerful tone of the flagship Yamaha concert grand, the CFX, and the unmistakable sound of a Bösendorfer Imperial are available at the touch of a button.

GrandTouch Keyboard with synthetic ebony and ivory keytops
The newly developed GrandTouch and GrandTouch S keys offer more responsive touch and a greater dynamic range than ever before. The pianist can experience a natural, balanced response from the tip to the very back of each key.

Enhanced Virtual Resonance Modeling (VRM) for a rich and bright sound
In a grand piano, sound resonates throughout the body of the instrument, producing a rich reverberation that envelops the listener in sound. These phenomena are reproduced perfectly in the Clavinova through Yamaha Virtual Resonance Modeling (VRM) technology.

Digital Pianos

CVP Series

Broaden your musical horizons with a comprehensive array of authentic Voices and a superb grand piano touch

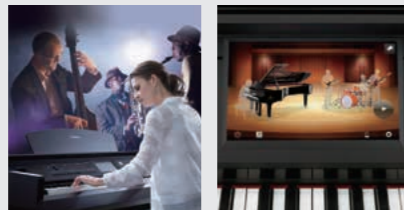

- Auto-accompaniment functions for full ensemble performance.
- Perform with an impressive library of Voices, comprehensive karaoke and other vocal functions.
- Enjoyable learning functions for players who are just starting out!

CVP-800 Series

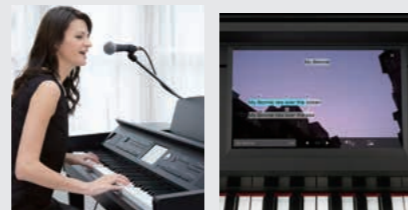

A comprehensive library of instruments to choose from

With the CVP Clavinova, there is no limit to the music you can create. Explore stunningly detailed pianos, breathy saxes and resonant strings. The CVP Series Voice and Style features give you fast, easy access to a wide variety of great-sounding backing bands that complement your playing.

The sound you've always dreamed of awaits you

Enter the Piano Room, where you can customize everything from the acoustics of the venue to the size and character of the piano and the musicians with whom you're performing. The Clavinova offers a wealth of options to tailor the sound as you like, and even make musical discoveries you never even considered.

Sing along with Clavinova

Connect a microphone to your Clavinova and enjoy fun, state-of-the-art, Karaoke features. The CVP Series will add natural harmonies to your voice as you sing, and can even mute the vocals of songs right out of your music library. You can even view song lyrics* on the LCD screen and change the tempo and pitch of the songs themselves.

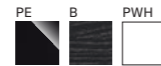

*Lyric display is only available when the audio contains the lyric data.

PIANOS

Digital Pianos

ARIUS

YDP models

Authentic sound, natural touch and an absolute joy to play in an advanced, yet affordable console digital piano.

YDP-164

Newly sampled for the YDP-164, the Yamaha's flagship 9' CFX concert grand piano offers sparkling highs and a powerful resonant bass combined in a sound that projects to the furthest reaches of any concert hall.

Rosewood

YDP-144

Immerse yourself in the sounds you create, whether purely for fun or as you strive for perfection. Suitable for hobbyists and students alike, The ARIUS YDP-144 is not only your trusted musical partner, but is also an elegant addition to your home decor.

Black

YDP-103

The YDP-103 has improved on the traditional AWM (Advanced Wave Memory) synthesis to deliver real piano sounds. AWM is a technology that uses digital recordings of sources, such as actual instruments, and allows you to enjoy grand piano reverberation wherever you are.

Rosewood

YDP-164

YDP-144

Portable Grand™

DGX-670

The DGX-670 offers a wide range of Voices in addition to the piano, from 630 realistic-sounding instruments including electric pianos, organs, and strings, to catchy synthesized sounds. The advanced Automatic Accompaniment Styles make it possible to jam with any number of other "musicians," from a combo to a big band. There are 263 accompaniment Styles including Rock, R&B and Dance. Enjoy an experience that feels just like playing a live session in a band.

DGX-670

* Optional accessories - L-300, LP-1 Adaptor - PA-300C

P-series

P-515

The P-515, you can enjoy the exquisite beauty and sought-after tone of both the Yamaha CFX and Bösendorfer Imperial concert grand pianos. With over 500 Voices, P-515 gives you a wide selection of sounds to choose from, making it the perfect tool to create and perform in any musical genre.

P-515

* Optional accessories - L-515, LP-1 Adaptor - PA-300C

P-125

The P-125 is a compact digital piano that combines incredible piano performance with a user friendly minimalist design. Easily portable and extremely accessible, this instrument allows you to experience the joy of playing the piano on your terms.

P-125

* Optional accessories - L-125, LP-1 Adaptor - PA-150B

P-121

The modest and compact design of the P-121 was created with user accessibility in mind. With the goal of being as user-friendly and approachable as possible, every element of the P-121 is designed to help keep the player focused on their playing.

P-121

* Optional accessories - L-121, LP-1 Adaptor - PA-150B

P-45

The P-45 represents outstanding value for money. The sound and keyboard response is excellent and its highly portable design ensures that you don't have to restrict your piano playing to just one location.

P-45

* Optional accessory - L-85 Adaptor - PA-150B

Smart Pianist™

Anyone can enjoy the piano more with Smart Pianist, a dedicated app for smart devices that provides various music-related functions when connected with your instruments.

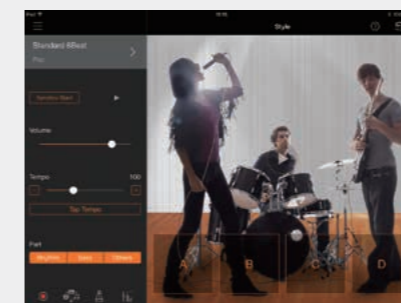

Easy Voice selection and Easy settings

In addition to selecting piano voices, you can use Smart Pianist to adjust parameters such as reverb from echoes in performance venues, and other factors that affect the sound of the piano.

You can use the layer function to overlay voices, or the split function to play different voices with the left and right hands, playing multiple voices simultaneously to create performances with a pleasingly full sound.

Backing band accompaniment that you can sing along with (CSP Series only)

Enjoy accompaniment from a dynamic backing band, even when you're playing by yourself. The accompaniment provides a wide variety of patterns across a range of genres to match your performance. You can also connect a microphone and sing along with harmony functions that allow you to automatically create a chorus backup for your performances, even when you're singing alone.

Play your favorite songs right away with the "Audio To Score" function (CSP Series only)

Smart Pianist features an "Audio To Score" function that automatically creates a piano accompaniment score from songs on your smart device, allowing you to enjoy playing along with your favorite tunes.

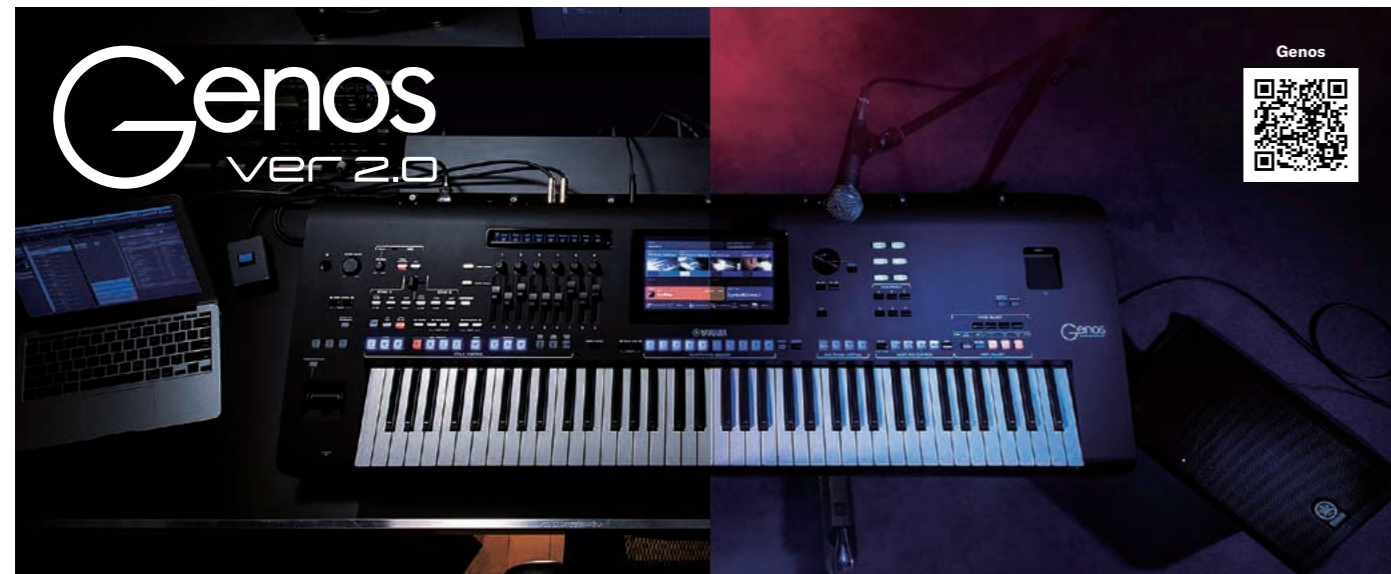

A variety of piano lesson pieces

With the app, you can play back song data such as Preset songs and commercially available songs.

Not only can you enjoy playing back Songs, but you can also practice along with them as they're playing back.

The app shows the notation of hundreds built-in MIDI songs, and even you can enjoy additional songs for purchase from Yamaha MusicSoft (<https://www.yamahamusicsoft.com>).

sonogenic

JAM Function Play with your favorite music!

Simply connect to the SHS-500 with the free "Chord Tracker" app and play along with songs stored on your smart device. No matter which keys you press, the notes automatically match the song, so you don't have to worry about hitting the wrong notes, fingering technique or even knowing the proper scales and chords.

SHS-500

Sonogenic SHS-500 is a new type of instrument from Yamaha that is perfect for music lovers who want to participate in making music, but maybe haven't learned how. This Keytar ("Key"board + Gui"tar") gives you the freedom to dance, jump and move around while you play!

SHS-300

The SHS-300 Keytar ("Key" board + Gui "tar") features a sleek, compact design that gives you immediate access to the exhilaration of playing music, even if you've never played an instrument before.

Key	Eb, Bb, C (Sync with voice)
Wireless	Bluetooth Audio

YDS-150

BREATHE NEW LIFE INTO YOUR DAY

Casual Wind Instrument

The new way to express your emotions

The Venova is a completely new type of wind instrument designed to enable anyone to learn to play with ease. Despite the simple fingering, it sounds just like a saxophone. Take this novel opportunity to transform your breath into richly expressive sound. Choose from one of two models to suit the musical range you want to play in.

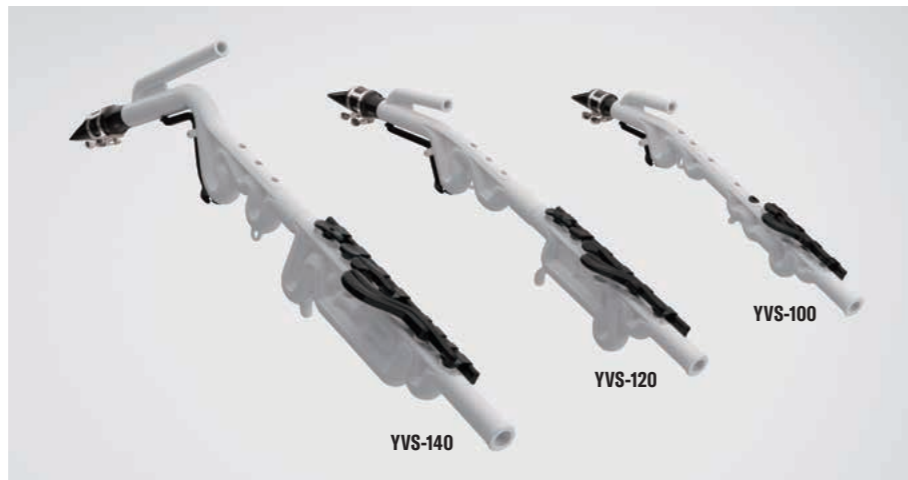

Watch this

Tenor Venova
YVS-140 **NEW**
The new YVS-140 Tenor Venova complete the lineup. A reserved and gentle tone similar to a tenor saxophone, the largest of the other models in size. The YVS-140 makes it easier to play a Tenor Saxophone.

Alto Venova
YVS-120
A mellow tone similar to an alto saxophone. With a larger size than the YVS-100, the Alto Venova makes it even easier for beginners to make music.

Venova
YVS-100
A bright tone similar to a soprano saxophone. Compact and lightweight to expand the range of venues and opportunities.

Form follows technology

Innovation and creativity do not come about by accident. Without going into the technical details, the unique shape of the instrument, which produces the sound of a full-size saxophone with much less body, is the result of many years of research.

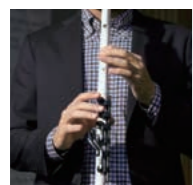

Explore where you play and how you feel

The compact, lightweight Venova is so easy to transport and maintain that you can enjoy it anywhere. Play the Venova at your favorite places to experience an unexpectedly fresh kind of freedom.

High water-resistance for worry-free playing

The durable ABS resin body is water washable, with a simple structure that's easy to clean.

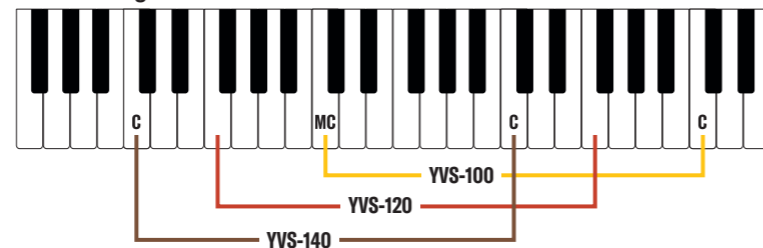

Easy fingering similar to a recorder

The fingering is simple and easy even for beginners.

A rich, expressive tone that plays naturally

Like the saxophone, the Venova is a single-reed instrument that sounds different depending on how hard or soft you blow.

Pianica & Recorders enable children to quickly experience the joy of playing music

Pianicas

P-37E Alone or in Ensembles

At first glance, one might take the pianica for a children's toy, but have you seen the video? Along with its simple refined design, this instrument's range of expression and beauty of tone may surprise you. With the P-37E, you can control the breath flow to produce a tone that sounds as if you are singing. It's a keyboard instrument that is fun to play alone or in an ensemble, and offers the added attraction of allowing the keyboard artist, who is used to having to play in one place, move around actively on stage while playing.

Pianica Specifications

Model	P-32D	P-37D	P-37E
Keys	32 (f-c [♯])	37 (f-f [♯])	37 (f-f [♯])

Weight	650 g	790 g	830 g

Recorders

Rainbow Recorders

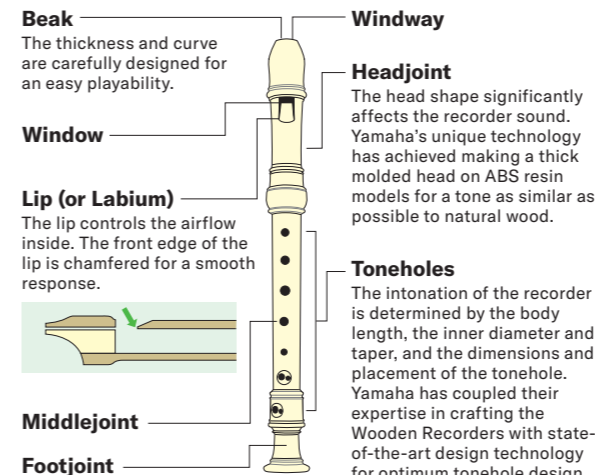

Music Can Be Fun!

The translucent, candy colored Rainbow Recorders are real instruments, not toys. They are made of the same ABS resin material as our regular recorders, and offer the same superior tuning, the same beautiful tone, and the same great durability. They play effortlessly with a rich, full sound, and with their colorful look they make even routine practice fun!

Yamaha Recorder Features

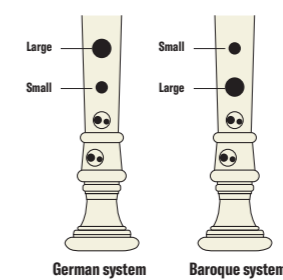

All models in the extensive Yamaha recorder lineup have been created with meticulous attention to detail and offer consistently high quality. A variety of materials, registers, and fingerings are available to meet a wide range of player requirements.

Part Names and Features

Fingering Systems

Yamaha offers a choice of either "Baroque" or "German" fingering systems on many models to accommodate local preferences and traditions.

LEAD FREE SOLDER

Lead-free Solder Yamaha wind instruments except gold flutes are constructed using 100% lead-free solder, showing Yamaha's long time concern for the environment. We spent years studying the acoustic changes brought about by the various possible alternatives, and we have discovered a new solder which is not only better for the environment but actually adds harmonic breadth to the sound.

STRINGS

Strings

V3SKA

This introductory model provides beginners with an instrument that plays with a satisfying tone and while offering outstanding durability. Each instrument is handcrafted utilizing the same traditional methods as used on high-end violins. It comes complete with case, bow and rosin so you have everything you need to play right away.

YE-104

Advanced Yamaha wood processing technology has resulted in the development and production of a next-generation electric violin that combines innovative beauty with solid live-performance features and potential. It is an excellent choice for music lovers who are looking for an instrument that will allow them to explore and enjoy genres beyond the classics.

YSV104

The YSV104 Silent Violin returns to the original Silent Violin concept as a refined practice instrument that provides an ideal blend of features and playability for violin players.

SLB300 **NEW**

The SLB300 is a brand-new type of electric upright bass that achieves natural sound and resonance by using the SRT POWERED system to simulate studio-quality sound in which the body resonance of a double bass was recorded using a high-quality microphone, all the while keeping a semi-solid body structure that emphasizes quietness and portability.

TransAcoustic™

LL-TA/LS-TA/FG-TA/FS-TA/CSF-TA/CG-TA

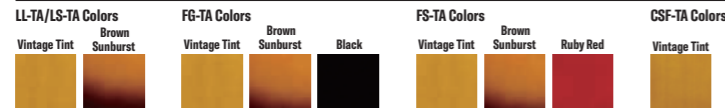

Acoustic Guitar (R)Evolution

Yamaha's TransAcoustic Guitar recreates the incredible experience of playing in a rich, live room without needing any external amplification or effects – just the guitar itself. Whether you're practicing, writing, recording or just playing for fun, the TransAcoustic Guitar will make you play better, longer and with more creativity. Once you've experienced it, you'll never want to play another acoustic guitar again.

SILENT Guitar™

SLG200S/SLG200N/SLG200NW

Whenever, wherever

The Yamaha SLG is the perfect instrument for practice, travel or stage use – any time an acoustic guitar just won't do. Near-silent performance makes discrete practice simple. Yamaha's exclusive SRT-Powered pickup system gives incredibly natural acoustic tone through headphones or line-out, studio-quality on-board effects enhance your playing to perfection, line-in functionality makes jamming easy and Yamaha's 50 years of building amazing guitars means it plays like a dream. Coupled with unique, striking looks and a rosewood and maple framed full-size collapsible body SLG lets you play whenever and wherever inspiration hits.

Genuine Yamaha tom and pipe clamps

Two 22.2 mm diameter tom clamps, and a pipe clamp. A versatile ball mount gives you the freedom to mount toms at any angle you want, and lets you incorporate other hardware* to create a configuration that's perfect for you.

*Hardware must conform to the standard Yamaha 22.2 mm specification. *Cymbals are not included in the package.

STAGE CUSTOM ALL BIRCH SHELL

100% Birch Shell Stage Custom has evolved again

As with the introduction of Stage Custom in 1995 Yamaha once again sets the standards of value and sound. By borrowing from our legendary Yamaha custom drums, we are proud to introduce new 100% Birch Shell Stage Custom.

Shell

The shell is a key factor in a drum's ability to "rumble," or resonate. Accordingly, the Stage Custom employs 100% birch - a classic in the realm of high-class drum kits. Moreover, with its six-ply structure the Stage Custom accurately conveys the vibrations produced at the impact surface, achieving performance that overwhelms anything in its class.

Stage Custom Birch

Separate Lug

Separate type lugs are designed with a small footprint that minimizes contact between the shell and lug to reduce dampening of shell vibration. An insertion plate set between metal parts and the shell isolates the metal parts from the wood further reducing dampening.

DD-75

Music in Motion

Welcome to the new era in synthesizers from the company that brought you the industry-changing DX and the hugely popular MOTIF. Building on the legacy of these two iconic keyboards, the Yamaha MONTAGE sets the next milestone for synthesizers with sophisticated dynamic control, massive sound creation and streamlined workflow all combined in a powerful keyboard designed to inspire your creativity.

Sophisticated Dynamic Control

Super Knob

Create dynamic sound changes from radical to sublime with the Super Knob. The Super Knob can control multiple parameters simultaneously resulting in anything you can imagine.

Motion SEQ

Motion Sequences are tempo-synchronized, completely customizable control sequences that can be assigned to virtually any synthesizer parameter and provide incredible creative new ways of programming sound.

Massive Sound Creation

AWM2

Powered by proprietary Yamaha technology for data compression and sound playback, AWM2 allows tremendous data compression without sound quality loss for unparalleled, realistic sound reproduction.

FM-X

Sophisticated pure synthesizer engine capable of producing classic '80s or cutting-edge, EDM sound with incredible dynamic range, power and fidelity.

Streamlined Workflow

USB Audio/MIDI Connection

MONTAGE's powerful USB driver can send 16 and receive 3 channels of STEREO 24 bit/44.1 kHz digital audio to/from your computer or iOS device (MONTAGE is class compliant, no driver needed!), no other hardware required!

SSS (Seamless Sound Switching)

Seamless Sound Switching (SSS) lets you change performances seamlessly without any cut-off in envelope or effects. This is perfect for live performances where you end one song and start another without stopping.

MONTAGE 8

Welcome to the new era from the company that brought you the DX and the Motif. Montage sets the next milestone with sophisticated dynamic control, massive sound creation and streamlined workflow.

MONTAGE8

MONTAGE White is a synthesizer combining sophisticated dynamic control, massive sound creation and streamlined workflow with an intense hot look. Make waves with MONTAGE White.

PERFECTING THE ART OF LIVE SOUND

DIGITAL MIXING SYSTEM
RIVAGE
PM SERIES

Perfecting the Art of Live Sound

All art, including art that involves sound and music, is expression that has an impact on the viewer or listener. It often begins with the artist's personal journey of self-discovery that sometimes grows and ripples outward in waves that resonate with people everywhere.

RIVAGE PM5

RIVAGE PM5 Mixing System packs undiluted RIVAGE PM power and performance into a lightweight, intuitive console that is surprisingly slim. The addition of a third display screen has made it possible to offer a more touch-centric interface in a compact, significantly lighter console that is easier to transport, setup, and operate in a wide range of venues.

RIVAGE PM3

The RIVAGE PM3 has a simpler single-display interface with 24 User Defined Keys to facilitate access and speed up operation. You still get full RIVAGE PM sonic quality, a full set of features, and 38 physical faders for intuitive hands-on mixing.

Specifications

	RIVAGE PM5	RIVAGE PM3
Control Surface	CS-R5	CS-R3
DSP Engine	DSP-RX-EX/ DSP-RX/ DSP-R10

Powered Monitor Speakers

POWERED MONITOR SPEAKER

MSP3A

MSP3A

The versatile MSP3 reference monitor has been renewed as the MSP3A, featuring a new Twisted Flare Port that delivers clearer bass from a simpler, more beautiful design.

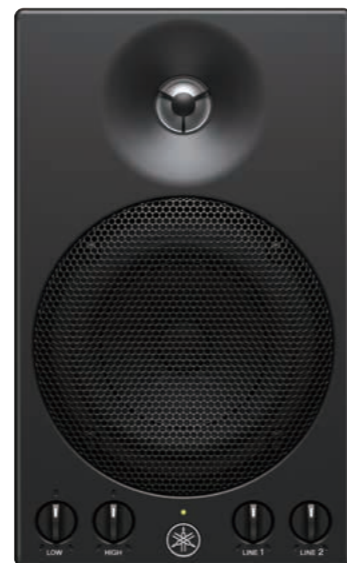

With a 22-watt built-in amplifier, the MSP3A offers faithful sound reproduction, and like its predecessor, has a variety of inputs and controls and is compatible with numerous optional support brackets.

The MSP3A is an ideal choice for small studios and post-production setups, as well as also for monitoring electronic instruments and surround reproduction.

Specifications

		MSP3A
Speaker Type		2-way powered speaker, Bass-reflex type (Twisted Flare Port)
Frequency Range (-10dB)		67Hz - 22kHz
Components	LF	10 cm Cone
	HF	2.2 cm Dome
Crossover		4kHz
Output Power		22W
I/O Connectors		LINE 1 : RCA, LINE 2 : Combo (XLR/TRS phone)
Power Consumption		30W
Dimension	WxHxD	144 x 236 x 166 mm
Net Weight		3.6 kg
Power Requirements		May vary depending on region : 120V 50/60Hz, 110 - 120V 50/60Hz, 230V 50/60Hz, 220 - 230V 50/60Hz, 220V 50Hz, 240V 50Hz
Flying & Mounting Hardware		2 x M5 (Depth 15)
Optional		Mic stand adaptor BMS-10A, Free-angle clamp BAS-10, Wall mounting bracket BWS20-120 / BWS20-190, Ceiling bracket BCS20-150 / BCS20-210

PX Series

PX series models are driven by a newly developed Class-D amplifier engine that concentrates all the necessary functions into a single custom LSI chip, and uses PLL technology to control transfer characteristics in real time, achieving impressive sound quality and power.

DBR Series (Powered Loudspeakers)

DBR10, DBR12, DBR15

High-Efficiency 1000W Class-D Amplifiers

The DBR's lightweight, high performance Class-D amplifier is capable of producing up to 1000W* of power, achieving an SPL of 132dB, delivered with remarkable clarity and dynamic characteristics. *DBR10 has an output level of 700W.

Custom Designed Transducer

The high power output woofers deliver well-defined, powerful bass with minimal distortion, while the 1.4" precision compression driver* produces accurate mid-range and high frequencies. *DBR10 features a 1" compression driver.

DBR Series

Specifications

		DBR10	DBR12	DBR15
Maximum SPL		129dB SPL	131dB SPL	132dB SPL

DXR mkII Series (Powered Loudspeakers) DXS mkII Series

DXR8mkII, DXR10mkII, DXR12mkII, DXR15mkII, DXS12mkII, DXS15mkII

Louder, Lighter, Legendary

DXS mkII Series

DXR mkII Series

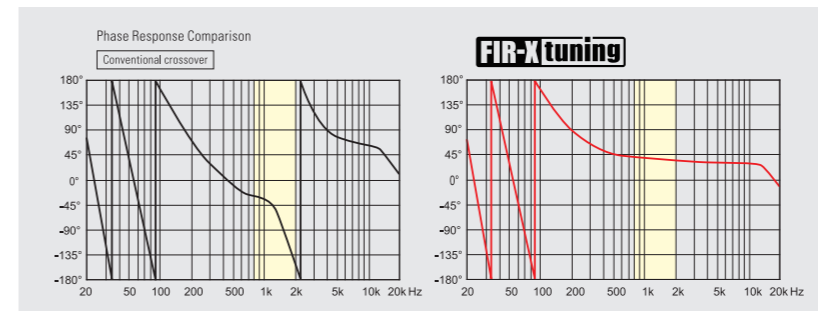

Less Weight, More Power

Custom-Designed Transducers improved : All DXR mkII Series transducers were meticulously selected and thoroughly customized to deliver ultimate performance. The high power output woofers deliver very low distortion and defined, deep bass, while the newly equipped larger, yet much lighter 1.75" Neodymium precision HF compression drivers produce accurate midrange and high frequencies up to 20 kHz with less weight.

Ultra-Precise 48Bit DSP Processing for High-Definition Sound

All full range models feature Yamaha's proprietary FIR-X tuning™ utilizing linear phase FIR* filters for the crossover network. FIR-X™ tuning simultaneously optimizes frequency and phase response while adjusting the time alignment between the HF and LF transducers. This creates a very smooth response around the crossover point, providing much better clarity and imaging than what is possible with typical crossovers.

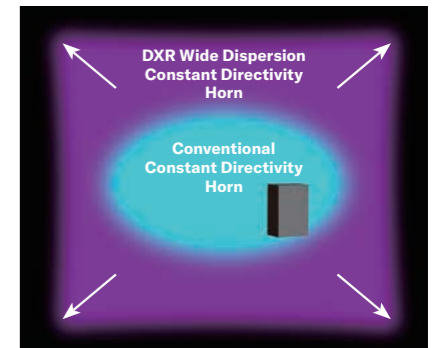

All signals are precisely processed by a 48bit (76bit accumulator) high-performance processor for high definition sound quality. All full-range models employ high-precision 24bit discrete A/D and D/A converters with superior S/N ratio and dynamic range.

* Finite impulse response

Specifications

High-Efficiency 1100W Class-D Amplifiers

All-New Compact, High-Power DXR mkII Amp Modules: All DXR mkII Series loudspeakers are equipped with highly efficient Class-D amplifiers that were optimally designed to match the DXRmkII's HF and LF transducers.

DZR Series (Powered Loud Speakers)

DZR315, DZR315-D, DZR15, DZR15-D, DZR12, DZR12-D, DZR10, DZR10-D

DXS XLF Series (Powered Subwoofers)

DXS18XLF, DXS18XLF-D, DXS15XLF, DXS15XLF-D

Power and Performance. Integrated.

Best-in-class SPL performance, sophisticated DSP processing, unrivaled low-frequency sound reproduction—the new DZR delivers on all fronts realizing a truly professional sound with a level of power that belies its compact, lightweight design.

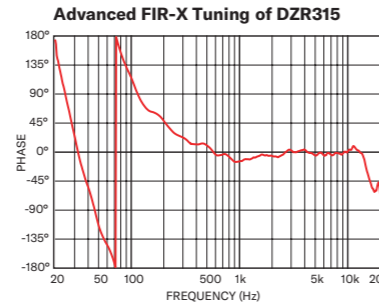

DZR/DXS XLF Series

Yamaha DSP: Intelligent Processing for Consistent Clarity and Power

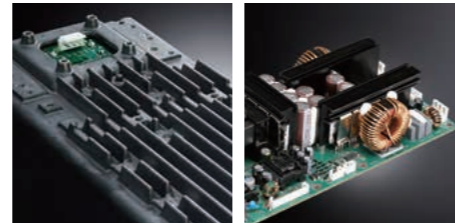

Advanced FIR-X Tuning

96kHz DSP processors help focus the considerable power output of the DZR into truly high-resolution sound with super-low latency.

High power 2000W Class-D amplification

The all new, highly efficient Class-D amplification module produces best-in-class 2000W of power and impressive 143dB SPL. A universal switching mode power supply with PFC maximizes the power output while ensuring stable and worry-free operation.

The first Dante-equipped professional SR loudspeakers

All DZR speakers and DXS-XLF subwoofers come in Dante-equipped "D" models enabling smart system integration with Yamaha consoles and other Dante devices via the Dante I/O (2in/2out) which also features SRC (sample rate conversion) allowing 48kHz device compatibility. Patching is simplified considerably with Yamaha CL/QL digital mixing consoles from the I/O device display, while TF console users can select Quick Config for surprisingly fast, easy set up and operation of a sophisticated sound reinforcement system.

Smart design for professional functionality

DZR15, DZR12 and DZR10 speakers feature a rotatable horn to allow vertical or horizontal mounting to further adapt to the acoustic dimensions of a venue. The coverage angle of the DZR15 is 90x50° and the DZR12 and DZR10 have 90x60° dispersion from a vertical position. The constant directivity horns were designed with the goal of providing smooth, level coverage across the intended coverage area, minimizing roll-off that is common in conventional horn designs.

Movie

STAGEPAS 1K

1000W, portable PA system with 5 channel digital mixer, 12" subwoofer, 1.5" x10 line array speaker, a Bluetooth input, SPX digital reverbs and 1knob EQ and multi band comp for master output.

- 1000W (HF:190W+LF:810W) power output
- Biggest in the class 12" subwoofer for low frequency
- 1.5"x10 slim line array speaker for high frequency
- Digital mixer (3 mono mic/line + 1 stereo line)
- Multi band comp "mode" for master output
- 1-knob EQ for per channel
- High resolution SPX digital reverbs (4types, parameter control)
- 2x Hi-Z (high impedance) inputs
- Link out and monitor out
- Dedicated cover included
- Optional reverb foot switch
- Optional dolly for more portability

Specifications

	STAGEPAS 1K
Type	Powered subwoofer with a line array speaker
Maximum output level (1m; on axis)	119dB SPL
Frequency Range (-10 dB)	37Hz - 20kHz
Power consumption	25W (Idle), 85W (1/8 power)
Power Requirements	Depending on area of purchase: 100V 50Hz/60Hz, 110V/120V 60Hz, 220V-240V 50Hz/60Hz

Compact and light enough to carry by hand, STAGEPAS is an all-in-one PA system that you can take literally anywhere.

Fast and easy set-up

With its intuitive, simple design, STAGEPAS can be set up and ready to go in a matter of seconds.

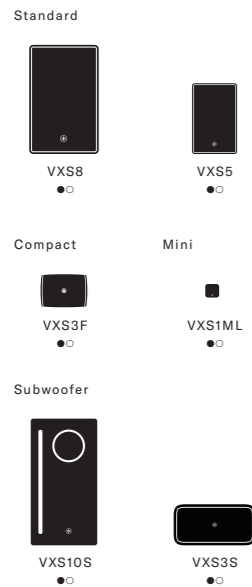

FOR COMMERCIAL INSTALLATIONS

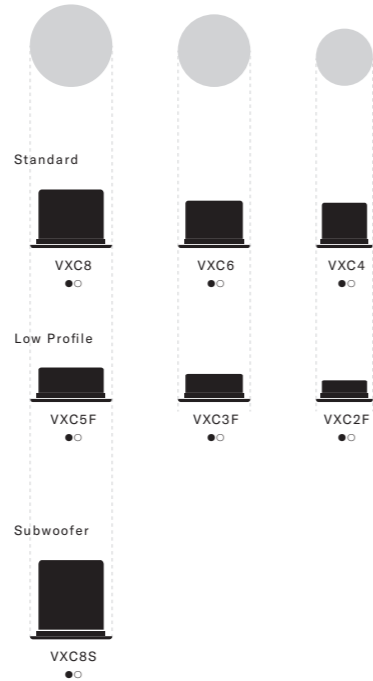

MUSIC TO YOUR EARS
Yamaha Speakers since 1967

VXS, VXC and VXL series speakers have been optimized specifically for commercial sound applications, with accurate sound inspired by our long history of musical instrument production plus visual design that blends easily with any décor. Choose the models that best suit your needs from our ample lineup.

Surface-mount Speakers/Subwoofers VXS SERIES

In-ceiling Speakers/Subwoofers VXC SERIES

Column-type Line Array Speakers VXL SERIES

Recommended Combinations

FOR SIMPLE SOUND SYSTEMS
I MA/PA Series

Recommended applications:
Cafes, restaurants, bars, retail stores, classrooms, presentation rooms, etc.

FOR ADVANCED SOUND SYSTEMS
I MTX/MRX/XMV Series
I Controllers
I Peripherals

Recommended applications:
Conference rooms, lecture halls, restaurants, hotels, banquet halls, office complexes, multi-purpose facilities, shopping malls, etc.

Yamaha have always been proactive in developing and maintaining education and training programs that provide the information and know-how our customers need to make the most of professional audio products and systems.

PA Beginners Guide

For first-time or relatively inexperienced users who want to expand their general knowledge of sound reinforcement/PA, such as the roles of each device and how to use them.

Setting up the equipment

Playing in a Band

Here's an example of a PA for a band consisting of drums, bass, two electric guitars, a keyboard, and vocals.

Small Music Group

This setup is a PA for a guitar and keyboard accompanying a vocalist.

For Meetings

Here, the PA is for amplification in a meeting, using four microphones to allow many people to express their opinions.

DJ Party

This PA is for an event where a DJ will be performing. In addition to a DJ mixer, we will also connect playback equipment such as an iPod.

PA equipment types

Microphone types

A microphone is a device that converts sound into electrical signals. There are many types of microphone available for lots of different applications.

Cable types

A variety of cables and connector types are used to transmit signals for different equipment and applications.

Mixer types

There are several different types of mixer, including analog mixers, digital mixers, and powered mixers.

Power amplifier types

There are a variety of power amplifiers, including stand-alone power amplifiers, powered speakers, and powered mixers.

Speaker types

There are many different kinds of speaker, both passive speakers and self-powered speakers.

Application Guide

Application Guide

For users searching for common yet simple PA setups for live performance/music playback/speech and BGM applications for outdoor/indoor venues.

ADVANCED ANC
CUT THE VOICE, NOT MY MUSIC

By completely separated signal processing of background noise and music, Advanced ANC realizes ideal noise cancelling without losing music signal.

CAREFULLY REMOVING NOISE,
LEAVING MUSIC PURE

EP-E50A
Wireless Earphones

EP-E30A
Wireless Earphones

LISTENING CARE
GET CLOSER, NOT LOUDER

Intelligently cares for your hearing. Sounds at some frequencies are hard to hear at low volume. LISTENING CARE balances sound pressure and frequency spectrum.

Every note can be heard even at low volume.

COMFORTABLE FIT
FOR MORE MUSIC ENJOYMENT

The compact housing ensures a snug fit. A non-slip coating has been applied to the inner section to ensure it fits tightly to small ears and exceptionally comfortable for long periods of listening. With four different size eartips, you can be sure to have the fit that's just right for you.

TRUE SOUND
THAT CONVEYS THE ARTIST'S EXPRESSION

True Sound is created by Yamaha drawing on its unique know-how as a musical instrument manufacturer, and combining it with full focus on tonal balance, dynamics, and sound image. Our unique acoustic and electronics technology, including the adoption of newly developed speakers, delivers a profound musical experience that stirs your heart and your emotions—going beyond mere audio and making you feel as though you're right there in the presence of the artist.

MusicCast

MusicCast

What is MusicCast?

Discover the powerful capabilities of Yamaha's whole-home technology that elevates your listening experience in the spaces you love. MusicCast represents the cutting-edge of audio technology and trademark sound quality that Yamaha is renowned for.

From AV receivers to sound bars, to wireless speakers - whatever your needs are, MusicCast brings your home entertainment experience to a whole new level.

Music Cast

Life Style

WX-051

MusicCast 50

Expect the unexpected with room-filling, dynamic sound from this feature-packed party starter brought to you by the world's biggest sound company.

WX-021

MusicCast 20

The MusicCast 20 delivers versatile listening with ease - able to be used as a standalone speaker, paired, or acting as surround speakers with a compatible MusicCast AV receiver or sound bar.

Place it anywhere

NS-NSW100

Network Subwoofer

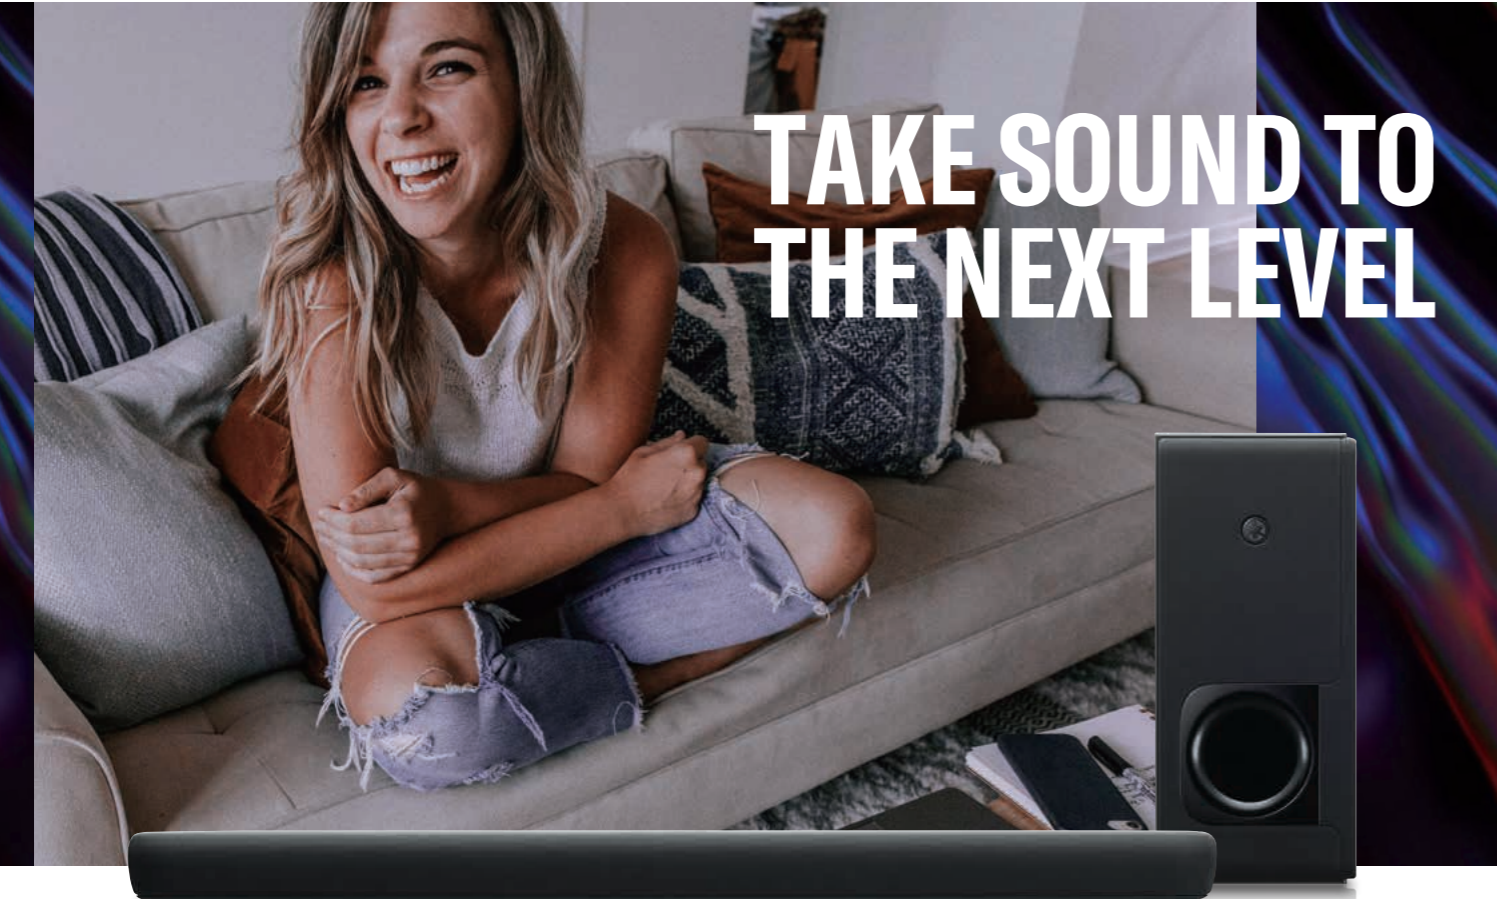

Black

Piano white

- 20 cm woofer unit with Twisted Flare Port for rich and clear bass

Sound Bars

* Voice and streaming service availability varies by region and product.

YAS-209
Sound Bar

Level up your TV sound. Enhance your TV, movies and games with built-in Alexa voice control, DTS® Virtual:X™ virtual 3D surround sound, a wireless subwoofer, and Bluetooth® streaming all in a simple, sleek setup.

- Key Features**
- Built-in Alexa voice control for easy control of your sound bar, smart home devices, music and more
 - Wireless subwoofer for deep bass with flexible placement
 - Clear Voice for enhanced dialogue clarity
 - DTS® Virtual:X™ virtual 3D surround sound
 - Bluetooth® streaming for your music and podcasts

YAS-109
Sound Bar

Minimalistic, but far from basic. Experience trademark Yamaha quality sound for your favorite movies, music, and games - all from a sound bar that fits discreetly in front of your TV or rotated for a low-profile wall mount. Built-in Alexa voice control means managing your sound bar, smart home devices, and Amazon shopping list is as easy as asking. Setup is a breeze with a simple connection to your TV while Bluetooth® lets you wirelessly stream music and more.

- Key Features**
- Built-in Alexa voice control for easy control of your sound bar, smart home devices, music and more
 - Dual subwoofers built in for deep bass from an all-in-one sound bar
 - Clear Voice for enhanced dialogue clarity
 - DTS® Virtual:X™ virtual 3D surround sound
 - Bluetooth® streaming for your music and podcasts

DTS Virtual:X

Immerse yourself in the latest blockbuster with exhilarating surround sound delivered by DTS.

DTS Virtual:X envelops the audience with a 3D sound field that comes from above as well as around you.

Experience wide and immersive sound, all from a single sound bar solution.

Pump up the bass (YAS-209)

A key benefit of having a sound bar is the ability to minimize clutter – eliminating the need for surround speakers and cables throughout a room.

A wireless subwoofer system takes this a step further by offering even greater flexibility in positioning.

Experience explosive bass while enjoying the versatility of being able to place the subwoofer anywhere in the room.

Voice control

"Alexa", turn the volume up in the lounge room."

With Alexa voice control integration, all you have to do is ask. The YAS-209 offers built-in Alexa voice control for easy control of your sound bar, smart home devices, music and more.

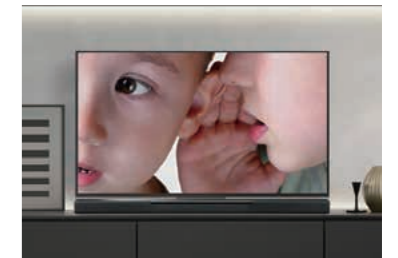

Additionally, a Mute feature ensures your privacy when needed by muting Alexa. *Availability of Amazon Alexa voice control varies by country.

Clear Voice

Finding it difficult to hear the dialogue in the latest action blockbuster?

Clear Voice mode accentuates vocals so you don't have to keep adjusting the volume.

Seamless music streaming

Simply pair your Bluetooth device with the YAS-209 and start streaming your favorite tunes or video sound wirelessly to your sound bar.

Alternatively, stream music directly to the YAS-209 with Spotify Connect* and Amazon Music* for uninterrupted playback.

*Streaming service availability varies by region and product.

Easy to install, easy to use

The YAS-209 is the instant upgrade to your TV sound. With HDMI-CEC, you can even use your TV remote control for added convenience*.

*Requires HDMI-CEC compatible TV.

SR-B20A B R WH

- Sound Bar with virtual 3D surround sound, built in subwoofer and Clear Voice.
- Built in dual subwoofers for deep bass in one slim bar
 - Clear Voice for enhanced dialogue quality
 - DTS® Virtual:X™ for virtual 3D surround sound
 - Bluetooth® connectivity for streaming wireless music
 - Simple Setup and Use with HDMI™ and Sound Bar Remote App

SR-C20A B R WH

- Compact Sound Bar with built in subwoofer, Bluetooth® and Clear Voice.
- The perfect space saving solution with uncompromised Clear and Immersive sound and built in subwoofer. (W600 x H64 x D94 mm)
 - Clear Voice for enhanced dialogue quality
 - Bluetooth® connectivity for streaming wireless music
 - Simple Setup and Use with HDMI™, Sound Bar Remote App, or Stereo connection (mini) for gaming

SURROUND:AI™

AI technology built into the DSP analyzes the entertainment content, and creates optimal surround effects to reproduce it with greatest impact. It focuses on distinct sound elements such as dialogue, background music, ambient sounds and sound effects, and then automatically optimizes the surround effect in real time. Imagine having a pro sound engineer right there while you're listening, tuning the sound specifically for you. AI technology creates an exciting sense of realism with expressive power beyond conventional sound field effects, giving you the most profound entertainment experience possible. Qualcomm® QCS407 with 64-bit high precision processing delivers precise surround sound.

CINEMA DSP HD³ for Movie, Music and Game

Yamaha's flagship 3D sound field playback technology was created by combining actually measured sound field data with cutting edge digital signal processing technology. The revamped CINEMA DSP HD³ features new signal processing algorithms and maximizes theatre sound effects, accurately reproducing a new dimension of realism for a sound field with a rich sense of presence and no feeling of boundaries. By using front, center and surround speakers to create a rear virtual speaker, CINEMA DSP HD³ playback up to 11.1 channels is possible* even with a 7.1-channel speaker configuration.

*Requires connection to a front presence speaker.

Dolby Atmos® with Height Virtualizer

For those without in-ceiling or upward firing speakers in their system, Dolby Atmos with Height Virtualization Technology simulates the Atmos experience with forward facing-drivers. Configure up to five speakers to replicate the effect of two in-ceiling speakers, or utilize all seven channels to simulate the powerful effect of four overhead speakers. Feel every dimension in Dolby Atmos. Enjoy a 5.1 surround speaker system and two additional overhead speakers or two Dolby Atmos elevation speakers, delivering dramatic overhead effects for truly enveloping audio - including Dolby Surround upmixer for legacy content.

YPAO™ - R.S.C. (with 3D, Multi-Point Measurement and 64-bit High Precision EQ)

YPAO-R.S.C. (Reflected Sound Control) analyzes the room acoustics with the included YPAO microphone to tune your system for the best sound in your unique room. It employs R.S.C. to correct early reflections for studio-quality surround sound. YPAO 3D provides automatic sound parameter optimization that maximizes the 3D sound field effectiveness of SURROUND:AI as well as Dolby Atmos and DTS:X. 64-bit high precision EQ calculation achieves the most natural room acoustics possible.
