Who we are

The **Trinitarian Bible Society** is headquartered in the UK with branches in Australia, Brazil, Canada, New Zealand, and the USA. Our members are Protestants who believe in the doctrines of the Holy Scriptures and the Holy Trinity.

Our purpose

On 7 December 1831, over two thousand people gathered at Exeter Hall, London, England, for the inaugural meeting of a new Bible society. Since that meeting, we have seen God's hand upon the work and through the many changes we have experienced over this long period of time. But one thing has not changed: our aim.

The object of this Society is to promote the Glory of God and the salvation of men, by circulating, both at home and abroad, in dependence on the Divine blessing, the HOLY SCRIPTURES, which are given by inspiration of God, and are able to make men wise unto salvation, through faith which is in Christ Jesus.

What we do

Our work is, first and foremost, in providing people throughout the world with accurate and trustworthy editions of the Holy Scriptures, translated from the best Biblical language texts.

Translating

We have over 45 Bible translation or revision projects in progress. Where possible we translate straight from the biblical languages, using the Hebrew Masoretic and Greek Received Texts. We use formal equivalence principles so that our translations are as close as possible to the Scriptures as inspired by God.

Publishing

We publish reliable Bibles and Scripture items in more than **30 languages**. We seek to produce Bibles that are attractive and long wearing, as we recognise that in many cases one Bible might have to last a person a lifetime.

Distributing

Millions of the Society's Bibles and Scripture items are distributed throughout the world each year, either as sales or as grants. Through the generous support of our members and friends, the Lord has enabled us to provide free or subsidised copies of His Word to many individuals and organisations.

Promoting

We promote Bible translations which are accurate and trustworthy, having been translated from the best texts using the formal equivalence method.

Upholding

We uphold the Protestant doctrines of the Holy Scriptures and the Holy Trinity. It was steadfast adherence to these vital doctrines which led to the formation of the Trinitarian Bible Society in 1831, and we remain as committed to them now as we have always been.

PSALM 71
IN thee, O LORD, do I put my trust:
 let me never be put to confusion.
 2 Deliver me in thy righteousness,
 and cause me to escape: incline
 thine ear unto me, and save me.

Unique TBS Publications Hebrew and Greek Bible

The Hebrew and Greek texts underlying the Authorised Version

God inspired His Word to be written in Hebrew and Aramaic in the Old Testament and Koiné Greek in the New Testament. The Trinitarian Bible Society is pleased to publish the Bible in these Biblical languages, providing in one volume the Scriptures in the tradition of those used during the Reformation. The text of the Old Testament is the Ginsburg/Bomberg Masoretic Hebrew Text; the New

Testament is the Greek Textus Receptus of F. H. A. Scrivener. We believe that this edition of the *Holy Bible in the Biblical Languages* will be useful not only to scholars and students, but to anyone wishing to have a complete edition of the texts underlying Reformation-era Bibles.

All of our Bibles are produced with great care and attention to detail, as befits the Word of God. Of course the most important part of any Bible is the text. We publish only Bibles translated from the Hebrew Masoretic Text and the Greek Textus Receptus (or the Authorised (King James) Version in a small number of cases) using formal equivalence principles of translation. However we also seek to produce Bibles that are attractive and long wearing, as in many cases one Bible might have to last a person a lifetime. The following overview explains in ten steps how our Bibles go from design to delivery.

Step 1: File production

The Scriptures we publish were either translated/revised by the Society or are existing translations. In either case, we seek to develop a reliable digital form of each text so that we can publish it in hard copy and electronically.

Step 2: Page design

Each Scripture portion is given its own design by our graphic designers. They consider how the design will affect the overall look but also the page count (which impacts printing costs), and how font size must be easily readable even to people with poorer eyesight. But most important is the recognition that this is the Word of God: the design must reflect the One who gave the Scriptures.

Step 3: Typesetting and proofreading

The book is then typeset according to the chosen page design and returned first to the translator and then to our staff for proofreading. Every verse is counted, and page features such as running heads, fonts, and chapter and verse numbers are checked for accuracy. The typeset digital file is sent to the printer who arranges the pages into sections (called signatures)

usually of 32 or 64 pages. Finally a digital proof is sent to us for checking and any necessary changes are made.

Step 4: Production of printing plates

The printer transfers the digital file to the plate-making room, where printing plates are created using a hard yet flexible metallic material. These are put on the printing press; the paper, on large rolls, is installed; and printing begins.

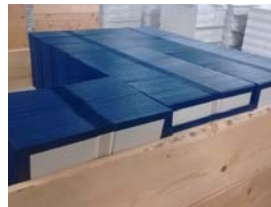

Step 5: Printing

The paper is run through the press at high speed whilst being kept taut at all times. The size of the page will determine whether one-, two- or three-up printing is used. For larger Bibles, only one set of signatures can be printed at a time. For smaller Bibles, two-up printing can be used, and for the smallest Bibles and New Testaments, three sections are printed together.

Step 6: Folding, gathering, and sewing

As the printed pages leave the press they are folded into the familiar format that will eventually be bound in the completed Bible. The pages, in signatures, are gathered to produce book blocks. Each set of signatures passes through a sewing machine for stitching, which makes the book blocks more robust. Thicker endpapers are sewn onto the printed sections before a thin layer of glue is applied to the spine for added strength.

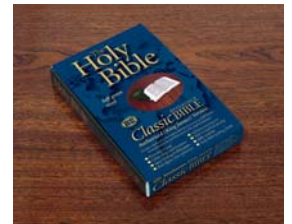

Step 7: Binding

Often a number of different bindings will be used for a particular print run, from inexpensive vinyl-covered paperback to luxury calfskin leather. For paperback editions the cover is glued directly to the spine of the book block. For hardcover editions the inside cover boards at the front and back are glued to the endpapers.

For leather editions the endpapers are glued to a vinyl endleaf which is in turn glued to the back of the leather cover material. A wide range of permutations may also be specified for particular editions, such as gilt page edging, head and tail bands, marker ribbons, thumb indexes, and zip covers.

Step 8: Packaging

For display, information, and added protection, sales sheets or boxes are prepared and the packaged Bible is shrink-wrapped in plastic. Clamshell boxes provide a hinged case whereas slipcases provide a sturdy package which is open on one side.

Step 9: Receipt and approval

Shrink-wrapped pallets containing heavy boxes full of Bibles are transported from the printer to our warehouse. A member of the Editorial Department examines several samples page by page, as well as copies from each pallet, to ensure that everything is as it should be. If all is well, the shipment is cleared for distribution.

Step 10: Delivery

And finally the Bibles are ready to be circulated among the nations of the world. Some are set aside for Grants, where we will give them away free of charge. Others will be sold, often at heavily discounted prices. All leave our premises with the prayer that their readers will grow in the Lord's grace.
