It raises the comfort bar for premium ANR headsets to cloud nine.

With a heat-absorbing, Outlast® technology head pad to keep you cool and comfortable in flight, a swivel hinge stirrup design that virtually eliminates clamping pressure, and plush leatherette ear seals with memory foam that caress the contours of your head – the DC ONE-X raises the comfort standard for premium ANR headsets.

Even during longer flights, you'll feel like you're on cloud... well, you get the idea.

Call **1-800-298-6235** for more information or purchase direct from David Clark at **www.davidclark.com**.

WELCOME TO THE 48TH ANNUAL

Presented By:  FLORIDA
RESTAURANT &
LODGING
ASSOCIATION

Thank you, thank you, thank you to all the dedicated sponsors, exhibitors, vendors, partners, and most importantly, all the wonderful fans, patrons, staff, and volunteers that have helped Aerospace Center for Excellence and SUN 'n FUN attain **so many incredible successes** over that last ten years. Nancy and I have **truly been blessed** to be a part of such a powerful team that literally accelerated ACE/SNF to supersonic speed and created the flight path that will take us into orbit. Being able to envision and build ACE with the Ramus SkyLab Innovation Center as a **cornerstone of youth aerospace education** has been the highlight of our lives. Though flying fighters from aircraft carriers was exciting and leading sailors in combat was rewarding, nothing tops the feeling of accomplishment of watching ones efforts result in the **changing of young lives for the better.**

When Aerospace Expo customers of all ages thoroughly enjoy their fly-in experience, we know we have produced a **model of success.** The youth we engage through this model move on to **productive and accomplished lives.** For **forty-eight years** the entire team from Pioneers to today's ACE/SNF Boards have dreamed of and strived for a primary purpose — a focus on aviation education. **Today, we have achieved it!** With our financial foundation secure and our ACE/SNF campus thriving, we are ready for Gene Conrad to pilot our craft to new heights of success and attain yet to be imagined levels of professional performance ensuring that ACE/SNF is the Leading Edge in **"Building a brighter future through aviation."**

Nancy and I will **forever be grateful** for the opportunity you have afforded us over the last 10 years to be part of something much bigger than each of us individually and ultimately leave a **legacy of accomplishment** of which we can be so rightfully proud. Keep your knots up and I'll keep your "six" clear as your newest wingman!

John "Lites" Leenhouts
Aerospace Center for Excellence President & CEO

A MESSAGE FROM NEW CEO, GENE CONRAD

I am honored and humbled to succeed John "Lites" Leenhouts as the next President and CEO of the Aerospace Center for Excellence (ACE) and the SUN 'n FUN Aerospace Expo. Leading the organization over the last ten years, Lites, the SUN 'n FUN team, and volunteers have accomplished the unthinkable with the creation and expansion of ACE and the continued growth of the SUN 'n FUN Aerospace Expo. I probably know better than most what has been accomplished because for the last 12 years I have had a front row seat to the success as the former airport director of Lakeland Linder International Airport (KLAL). Lites, your passion and dedication to ACE, SUN 'n FUN and the aviation community, young and old, has left a lasting legacy on this organization and we are all grateful for a job well done!

You may now be wondering why I made the decision to resign as airport director of KLAL to become the President and CEO of ACE and SUN 'n FUN. In 1975, I was born in Oshkosh, WI to Blair and Nancy Conrad. Earlier that year my mother, father, and two sisters moved to Oshkosh as my father was selected to be the next airport manager of Wittman Regional Airport (KOSH), following the late, great Steve Wittman. My earliest childhood memories are of my first airplane ride in EAA's Spirit of ST. Louis replica, driving around the AirVenture and airport grounds watching my father's love and passion for aviation (also sitting in his office for many hours looking out the window, patiently, waiting for him to come pick me up), memories of having PB&J sandwiches in Steve Wittman's hangar that his wife Dorothy had made for me, and having dinners at Paul and Audrey Poberezny's home. Fast forward to the summer of 2009, while volunteering at EAA AirVenture, where I have volunteered for the last 34 years, I was made aware that the City of Lakeland was looking for a new airport director and I thought, "I have to get that job because Sun n Fun is there!"

When you know the amazing aviation upbringing I had, and my family's history in aviation and air shows, my move to Lakeland in 2010 to run KLAL and, now, my move across the airfield to be the next President and CEO of ACE and SUN 'n FUN, start to make sense: aviation is my passion and I am following my heart.

I look forward to meeting you this week as we all, through our attendance at the 48th annual SUN 'n FUN Aerospace Expo, Engage, Educate, and Accelerate the Next Generation of Aerospace Professionals!

Gene Conrad

STEM LEARNING LABS AT THE AEROSPACE CENTER FOR EXCELLENCE

The Ramus SkyLab Innovation Center is a gathering hub of emerging technologies built on a solid foundation of Science, Technology, Engineering, and Mathematics (STEM). With 8,000 square feet of convertible educational space, ACE can utilize an open, cross-sectional design to create a community of STEM learners. This space enables students to work hands-on with a variety of learning tools that allow them to learn at their own pace. Thanks to our internship program, our students had the opportunity to write about each classroom from their perspective.

Redbird Flight Simulator Laboratory

By: Braden Terry, ACE Jr. Intern, CFAA student - 10th Grade

The Flight Simulator Lab will get anyone started with flying. Redbird Flight Simulations donated twenty-two Redbird Jay Flight Simulators to be used as an introduction to flying. These simulators are very durable so that anyone from elementary to collegiate levels can experiment with flight. Each simulator has been programmed for situations specifically for newer pilots. For instance, one program helps someone understand how to land on a runway. It starts the simulation on a perfect glide slope near the runway, which anyone can practice landing. There are so many possibilities here at ACE, starting with the Redbird Flight Simulator Room.

UAS (Unmanned Aerial Systems) Laboratory

By: Ashlee Driskel, ACE Jr. Intern, CFAA student - 9th Grade

Our UAS Lab enables the students to explore the area of drones and rockets in the aerospace field, which includes flying, assembling, and testing these systems. It allows us to see that not everything is controlled by a person but also by robots or gravity. The drones give a good example of using a controller or device to control the flying robot instead of using a yoke for an airplane. These drones can teach you how to take videos or photos, tricks, and even fly a drone from the touch of a mobile device. The rockets, however, have absolutely no control, but they teach you how Earth affects these rockets by bringing them back to the ground. In conclusion, this room will not only open the student's eyes when seeking a pilot or engineering career, but both could inspire future drone pilots to join the aerospace field.

3D Printing Laboratory

By: Anthony Benash, ACE Jr. Intern, CFAA student - 9th Grade

In the 3D Printing Lab at ACE, we will be teaching students who visit during field trips or events how to 3D print, design basic models in CAD, and convert files to print. The 3D print side of SkyLab will be a collaborative part of all things ACE. We will assist the UAS Laboratory, Redbird Flight Simulations Laboratory, and the NOAA Laboratory (Science on a Sphere). Some things guests might do while they are here is help design and brainstorm ideas for future projects, including designing accessories, small drones, tools or parts for different things. They may also be given a problem that is affecting a community. Another project could be finding part of the Earth with Science on a Sphere and they will have to come up with a way to solve it with 3D printing.

Science on a Sphere Laboratory

By: Will Coral, ACE Jr. Intern, CFAA student - 10th Grade

Science on a Sphere is a system that projects images onto a sphere to be observed from practically any angle. This allows for a unique experience where you can view planets, moons, or even real-time weather without reducing the object onto a flat map. There are over one hundred seventy Science on a Spheres worldwide, but ACE's sphere is the only one that can be lifted to the ceiling, allowing the room to be converted into a usable hangar space. There are currently one hundred data sets loaded into the system, including all the planets of the Solar System, moons, real-time weather information, and even a real-time view of the Sun. There is also the ability to add custom data sets, allowing us to project practically any spherical object.

At the the Ramus SkyLab Innovation Center, all students can engage with the future of STEM, aeroSTEM, and aviation by using its' five tools of learning. With hands-on activities readily available, this is a place where some of the best and brightest future STEM professionals in the world will become modern innovators. Once here, youth and adult aviators can be educated in just about any topic imaginable on the world's first purposely built STEM, aeroSTEM, and aviation campus ecosystem. We at ACE are a proud provider of educational tourism and museum sciences learning opportunities.

TOURS DAILY 9 AM – 2 PM

SAFETY IS PRIORITY #1 AT SUN 'N FUN!

Enjoying the vast array of display aircraft is one of the leading reasons people come to SUN 'n FUN. However, the safety of guests and aircraft is paramount. Many pilots bring their personal aircraft to SUN 'n FUN to share the joy of flight with everyone. Please do your part to protect people and aircraft by following the safety rules below.

BY ATTENDING THE SUN 'N FUN AEROSPACE EXPO, YOU AGREE TO FOLLOW THESE IMPORTANT SAFETY GUIDELINES:

- Aircraft ALWAYS have the right-of-way. Please yield.
- Aircraft in motion have spinning propellers that cannot be seen and can cause serious injuries. Please be aware of this at all times to avoid injury to you and your party.
- You are responsible for your safety and the safety of those in your group.
- Please be responsible and courteous around the aircraft. Please do not touch the aircraft without the owner's permission.
- Please mind your camera, belt buckles and other clothing or accessories when bending over to look at an airplane.
- Be sure your lawn chairs are attended and secure to ensure they do not blow away and cause damage to people or aircraft.
- Children under 12 must be accompanied by an adult at all times.
- Drones are not permitted to be used on the SUN 'n FUN Expo Campus without written permission from SUN 'n FUN and the FAA.
- Pets must be on a leash and are only allowed in the campground.
- Service animals are welcome across the SUN 'n FUN Campus
- COVID-19 Guidelines: www.flysnf.org/covid-19-policy

**PETS, BICYCLES, SKATEBOARDS, HOVER-BOARDS, ONE WHEELS, MOPEDS AND
MOTORIZED SCOOTERS ARE PERMITTED IN THE CAMPGROUND ONLY. THESE
ITEMS ARE NOT PERMITTED IN ANY OTHER AREA OF THE SUN 'N FUN CAMPUS.**

**SMOKING IS NOT PERMITTED ON THE FLIGHTLINE,
EXHIBIT AREAS, OR AROUND ANY AIRCRAFT. PLEASE SEE
THE CAMPUS MAP FOR DESIGNATED SMOKING AREAS.**

Tampa International Airport is proud to be the Gateway to the treasures of the West Coast of Florida.

Conveniently located within 15 minutes of the Tampa business district and 30 minutes to the best beaches in the U.S., the Airport remains committed to boosting tourism and promoting the economic development of the region. The Airport is often ranked among the top in the country by passengers and was recently listed among the world's most hygienic airports for its measures taken to ensure public health and safety in the terminal and airside. TPA is currently offering non-stop service to more than 90 destinations in the U.S. and abroad.

The Airport's General Aviation system remains one of the most robust in the region with boundless growth opportunity at Peter O. Knight, Tampa Executive and Plant City Airports. Learn more about the Airport and the General Aviation System at TampaAirport.com

CONNECT WITH AOPA WHILE YOU'RE AT

AOPA Pilot Community meets at the AOPA campus.

Stop by the AOPA tent and outdoor displays

to check out the newly painted AOPA Sweepstakes Tiger! Our campus is located on Laird Blvd. (*next to the FAA building*).

- Our Ambassadors are here to serve and are equipped to help you get answers to your aviation questions.
- Stop by for our 2022 SUN 'n FUN special membership offer!
- Talk to our You Can Fly Ambassador (and Florida local), Jamie Beckett, to see what AOPA's You Can Fly program can do for you!
- Learn how to fly more affordably and more often, see how easy it can be to get back into the left seat again, and how to apply for our flight training primary and advanced rating scholarships at the Reimagined Cessna 152!

AOPA IS A PROUD SPONSOR OF THE 2022 SUN 'N FUN AEROSPACE EXPO!

Honda. On Land or Water, it's Power You Can Trust.

Wherever you roam, trust Honda, the name that powers lifestyles.

HONDA

REGISTER FOR A CHANCE TO WIN!

Scan a Honda banner on the grounds, or visit the Honda Generators Display to enter for a chance to **win a Honda EU2200i generator!***

* For rules and details, visit the Honda Generators Display. Please read the owner's manual before operating your Honda Power Equipment and never use in a closed or partly enclosed area where you could be exposed to odorless, poisonous carbon monoxide. Connection of a generator to house power requires a transfer device to avoid possible injury to power company personnel. Consult a qualified electrician. Always wear a personal flotation device while boating and read your owner's manual. All Honda outboards meet EPA and CARB emission levels. © 2022 American Honda Motor Co., Inc.

PROTECT YOUR INVESTMENT

Pays Dividends . . . Whether Flying or Parked!

500 HRS. W/CamGuard

Without CamGuard

- Fights Rust & Corrosion
- Reduces Cam & Lifter Wear
- Prevents Engine Deposits
- Conditions Seals

ASL Camguard™ is an advanced oil supplement, F.A.A. accepted for use in most piston aircraft engines. Camguard is formulated to safeguard the investment in your aircraft engine by addressing the complex and interrelated problems of corrosion, carbon deposits and mechanical wear.

Corrosion results in start-up wear or worse, cam and lifter failure. Camguard combats corrosion by leaving a continuous film of inhibitor on metal surfaces.

Deposits increase engine wear. They cause normally free moving parts to stick and they are abrasive. Camguard halts deposit formation, leaving your engine clean and parts free to move.

So whether you fly a little or a lot, Camguard always pays dividends with decreased aircraft engine maintenance costs. Just adding 5% of ASL Camguard to your oil at every oil change provides peace of mind that comes with knowing your investment is protected.
