NEW YORK, June 25, 1869.

The interest of our Stock Exchange during the month centered in the unnatural condition of the money market. In the month of June in former years, money at this business centre was abundant, and lending at the lowest rates of interest; but in this year the steady increase of the currency balance in the United States Treasury, resulting from the more faithful collection of taxes and the Secretary's policy weekly to sell two millions of the surplus gold, purchasing only one million of bonds for the sinking fund has been dexterously used by certain "bear cliques in stocks and gold" to make money so active and stringent, that in some instances a commission of  $\frac{1}{4}$ , and even  $\frac{3}{8}$  per cent per diem was paid for call loans on good collaterals, in addition to the legal rate of 7 per cent per annum. No proof goes further to show, that this stringency must be chiefly attributed to artful clique manipulations than the fact, that of late it has become of daily occurrence for money to be freely offered at 6 and even 5 per cent per annum towards the close of banking hours, whilst only a few minutes before it could hardly be obtained at from 1-64 to  $\frac{1}{8}$  per cent per diem. As a means of warfare between the "bulls and bears in our stock exchange," the condition of the money market can be of as little concern to the general public as the result of "dog fights" or "skinning games." But unfortunately the legitimate business of the country is made to suffer from this state of affairs, not only leaders in this city being unwilling to accommodate the trade at reasonable discounts as long as they can obtain usurious rates from "speculators," but surplus funds from the country also seeking a more profitable employ at this centre by helping the "speculators" in preference to accommodating the legitimate wants of their respective regions. We do not look to the Secretary of the Treasury for an "unfailing" remedy against the present unsoundness of the money market. Whatever policy his integrity and sagacity may inaugurate, will be sure to be perverted by powerful cliques for their "bear or bull schemes." Not before speculators and money lenders come to grief by the "bursting of inflated stock-bubbles," will the speculative fever which seems at present to pervade all classes of society, subside, investors turn their attention more to Government and other sound bonds, and money lenders be willing to rather accommodate at a legitimate interest, the legitimate trade and those laboring to develop the inexhaustible resources of this great country, than to obtain usurious rates from "speculators."

Discounts of commercial paper were inactive and nominal, a few transactions in prime double names being reported at 9@12 per cent. Foreign Exchanges are firm at the standard of sterling commercial, 60 days' 109½; prime bankers', 109½; sight, 110½.

Gold is unsettled at 137.

Governments are firm, though suffering from the condition of the money market. Southern securities are neglected.

Railroad and miscellaneous shares are wildly fluctuating of late. What people must be prepared for, when dealing in or lending

on this kind of stock, may be inferred from the instance of Mariposa preferred, dropping from 51 to 13 within 48 hours.

For to-days stock quotations see next page.

A convention of National Bankers was held at the St. Nicholas Hotel in this city on the 23d inst. The Hon. Theodore M. Pomeroy of Auburn, N. Y., was elected President; W. Sutton, of Mass., J. C. Moulton, of N. H., H. A. Thompson, of Md., J. S. Thomas, of Ohio and F. B. Lewis, of Conn., Vice Presidents; W. W. Teall, Geo. Adams and Edward Bates, Secretaries, and a committee of seventy-five appointed, whose duty it shall be to take such action as may be deemed necessary for perfecting the banking laws, for securing sound and legitimate banking, and to attend to all matters of mutual interest to the public and the National Banks. Mr. Pomeroy in his address to the convention held, that the most important reform in the banking system was a removal of the restrictions upon circulation. He considered that banking should be free, and that it is now a monopoly. In behalf of the banks he expressed the opinion that they will be ready to resume specie payments whenever the Government is.

The *Times* (financial article) says:

The banks of the City of New York have their entire circulation now in the hands of the public, and they hold, at present, but an inconsiderable amount of the currency of the country National banks. They hold only \$19,612,000 in greenbacks and greenback 3 per cents. The Treasury, in all its depositories, holds about \$19,000,000 of greenbacks and National bank notes. This time last year the Treasury held about \$30,000,000 of these notes, and the New York Banks \$72,561,000 in greenbacks and 3 per cent certificates. The profits of the Southern cotton crop mainly, and the rapid growth and prosperity of the Great West in part, have absorbed this difference of \$34,000,000. We begin to believe that the actual business of the country is outgrowing its present volume of circulation, and the surprise is that this widening field of employment for our paper currency should not tell more emphatically upon the market, as well as relative value of gold. It may be said that the condition of our foreign trade balances demands a large amount of the latter per annum. But the returns of the fiscal year now near its close will show that this demand has been scarcely one-half that of the previous year—about 40,000,000 against \$80,000,000.

## NEW COUNTERFEITS.

Every counterfeit that has ever been made has one or more mistakes in it. Our aim is to show what that mistake is.

### 50s, GREENBACKS.

Imitation. Observe the figures 50 on back of the bill around the margin. The 5 in the imitation runs into the 0 on the lower left corner, and reads 550 instead of 50. The buttons on Hamilton's vest which are very distinct in genuine are scarcely discernible in the counterfeit. Genuine has five white in the counterfeit you can hardly see four. The note is dated March 10th, 1868. We would advise our patrons to scrutinize carefully all \$50 Treasury Notes, unless they know the parties from whom they receive them.

### Wyoming Co. Nat. Bank, Warsaw, N. Y.

5s raised to 100s. The bank issues no notes above 20s. Easily detected by the 100s in the upper corners on the face of the note. The alterations are made by removing the color and printing in its place. The ONE HUNDRED DOLLARS after "will pay on demand," are unusually well put in. The green ink on the back is of a yellowish tinge.

### National Bank of R. I., Newport, R. I.

2s. imitation. Linely to deceive.

### Rhode Is. Nat. B'k, Providence, R. I.

2s imitation. Quite well done and very likely to deceive.

### 5s GREENBACKS.

The green ornamental engraving lengthwise of the bill in the counterfeit is of a paler color than in the genuine, and has a brighter look than the dark green of the original. Seen under the microscope the engraving is coarse, but to the naked eye the bills have a very good appearance.

### Albany City National Bank, N. Y.

19s, imitation. The engraving is scratchy, and the general appearance poor when compared with the genuine, but likely to deceive.

### Mutual National Bank, Troy, N. Y.

10s imitation. Well executed and likely to deceive. Shading of "United States" lighter than the genuine.

### National Bank of Lebanon, N. H.

10, imitation. Well done.

### St. Nicholas National Bank, N. Y. City.

2s, imitation. General appearance good. Shading under title of bank irregular.

### Auburn City National Bank, N. Y.

10s, imitation. The paper is good and will wear well. The front of the bill is quite well done, but the back is very much blurred—the left end of the centre engraving looking as rough as a brush heap.

### Gore Bank, Hamilton, Canada.

4s, a very close imitation—better refuse all bills of this denomination.

### 20s GREENBACKS.

A dangerous counterfeit. Green ink a good color, but the paper too yellow. Principal defect in the die. No clear and distinct lines around the 20. Looks more like a collection of several spots. Female well done, but the face rather coarser than the genuine.

### First Nat'l Bank, Louisville, Ky.

5s, imitation. Columbus at the left end of the note has no left hand. Engraving rather coarse and heavy.

## FRAUDULENT BANKS.

### Lynn Park National Bank, N. Y. (No such bank.)

2s. Very well done.

### Nat. Union Bank of Linderpark, N. Y.

2s, (NO SUCH BANK) well calculated to deceive.

### National Bank of Idaho Territory.

10s. Well done.

### National Bank of the State "IN" N. Y.

10s. Coarsely done.

### Mechanics' National Bank of Jaunesville, N. Y.—(NO SUCH BANK.)

10s. A very good looking bill—look out for them.

## COUNTERFEIT GREENBACKS.

1s, (1st kind) can be readily detected by the inferior style of the engraving, particularly the head of Chase. The mouth is crooked, the eyes imperfect, and the hair on the top of the head resembles side hair brushed over to cover baldness. The back is of a lighter green than the genuine.

1s, (2d kind) the general appearance is very coarse and may readily be detected; green ink is very pale. On the imitation there is a black streak, seen under the red figures on the upper part of the bill; none in gen.

2s, imit., well executed. Coat of Hamilton badly done. The shirt bosom of Hamilton is very dark and uneven, but in the genuine white and plain. The shading of the words "UNITED STATES" light and broken.

5s, 10s, genuine notes without the red seal, and others reported without the usual number being printed upon them.

5s, imit., words "United States" heavily shaded. Gen. are clear, lightly shaded and plain. The words "Patented Nov. 3, 1867," under the words N. Y. are not on the counterfeit bill. All the counterfeits are letter A, and are  $\frac{1}{2}$  inch shorter than the genuine.

On the new series of letter "A," around the figure of Liberty on left end is a plain black line. On the counterfeits, this line along the bottom of the figure running towards the right of the note forms two distinct lines, on gen. only one. But this

may be a counterfeiter's dodge to have it described and alter it afterwards.

5s, imit., this bill is well calculated to deceive, and the only difference we can detect is in the die on the right end enclosing the figure 5. The genuine has three black circles enclosing the 5. The imit. has only two, and on lower right end figure 8, and on left end series 90.

10s, Paper very light, and the green ink of a lighter shade. Dated March 10th, 1862.

10s alt'd from 1s, portrait of Chase on left.

10s imit. There are 16 small Xs on upper right margin, and only 15 on the genuine. The words "Printed by the National Bk Note Co." on lower left margin extends over 9 of the Xs on imit. and 8 on the genuine.

10s, imit., has 14 small x's on upper right margin—16 on left. The gen. has 15 x's each side on engravers name. Portrait of Pres. Lincoln is very coarse and pale looking; imit. are dated Washington, March 10, 1862, letter C.

20s, very close imit. of gen., the engraving is good, in the center figure the foot of the female can scarcely be seen. On the left end bottom are the words "Payable at the Treasury of the U. S. at New York." The A's in payable are too small and uneven. The letter 's' in the word 'The' is not crossed in the centre. The imprint is defective; the green ink is of too light a color.

50s, alt'd from 2s, portrait of Hamilton on left centre. The vignettes of the two-dollar and fifty-dollar Treasury note are the same. Ingenious persons are counterfeiting the body of the fictitious and using the vignettes of the twos, producing a note that deceives experts.

50s, imit. observe the figures 50 on back of the bill around the margin, the 5 in the imit. runs into the 0, gen. does not. The word 'FIFTY' around the above 50 can scarcely be read. Words 'LEGAL TENDERS' is very much blurred. Letter C dated March 8, '63. On the left lower corner the No. 550 instead of 50 enclosed in one circle.

50s, imit. observe the head of Hamilton, upon the face of the note, which represents the line of the waistcoat crossing the white collar at the neck. The acute angle formed by the shape of the collar, so far as it is shown, is perfect in the counterfeit note; but in the genuine the lines of the flesh were drawn by the engraver across the point of the collar at its junction with the waist coat, for the purpose of relieving the angle of the sharpness it would otherwise have exhibited. This difference is not readily observed unless the notes are perfectly clean. The other discrepancy is in the shape of the ornaments in the border on each end of the face of the bills, and in the whole border on the back. The figures, "50" are engraved on a green ground, of which the rim, in the genuine bill, is in octagonal form, rather well defined, though the angles are not sharp. The eight sides of what at first view appeared to be circles, may be easily discerned. In the counterfeit bill the border ornaments, containing the "50" are octagonal in only a very slight degree, and seem to be perfect circles. The general appearance of the counterfeit gives no indication of its true character.

100s, imit. the red figures are much larger than the figures of any Treasury Notes, the wings of the eagle are very coarse—the double rule running from it is heavier, and the curve twice as large, while there is a diagonal shading at the joint of the imprint with the rule, which does not appear on the genuine. On the right end of the back of the bill, the 100 in the circles are inverted, thus, 001. In the genuine this inversion is on the left end. The imprint, American Bank Note Co., is very uneven, and too large.

100s, imit., (2d kind) of the notes issued under the act of February, 1862, well executed. The spurs are smaller, and the coloring on the back is paler than on the genuine bill. The words "one hundred dollars" on the right hand side of the counterfeit are smaller than on the genuine note.

100s, imit., (3d kind) the note is smaller than the genuine, the spread eagle is very coarse, and the shading of UNITED STATES is badly done. The bill is calculated to deceive.

## COUNTERFEIT COUPONS.

The following are the words on the coupons: "Acts of July 17 and August 5, 1861. The United States of America will pay to bearer six hundred dollars for six months' interest due 1st January, 1867, upon bond No. 735, for \$500. L. K. Chittenden, Register United States Treasury."

FIVE CENT COIN COUNTERFEITS. Are in circulation. They may be distinguished from the genuine by the softness of the metal.

## COUNTERFEIT FRACTIONAL CURRENCY.

## Old Issue.

50s, imit., the portraits of Washington differs one from another; in the genuine they are all alike; the green color looks light and pale.

25s, imit., well executed. Look out.

## 2d Issue.

10s, imitation. All gen. on the top has the word "Depositories," the imitators reads "Depositories."

50s, imit., have a pale slate color. The small barrels on lower right corner are very indistinct. The gen. have six barrels perfectly clear and plain. Three on lower row, two on next, and one on top. The counterfeit barrels are black, and gen. are white.

50s raised from 6s.

## 3d Issue.

50s, imit.; two kinds of the new long 50 cent currency. The imitation of one kind has DESIGNATED on upper right corner instead of DESIGNATED. The second kind has designations correctly spelt, but on the little American Shield, under the Eagle, there is a black line drawn across the upright bars of the Shield. Not so on the genuine.

25s, imit., are very pale and coarse. The letter C in cents on left end is smaller than the other letters, and too far off.

## New Issue.

25, imitation. Above the words "Treasury Department," on the bottom of the bill in the genuine there is a fine dotted line—the counterfeits have a straight line.

Notice the shading of the "25" on the back of the note. The genuine is dark, while the counterfeit is very pale, and very little darker than the other green. The word "of" on the face of the genuine appears thus—"of"—on the counterfeit "of."

25s, imit., well executed, but may be detected by the absence of a period (.) after the word "Treasurer under Spinner's name; the work is better than any we have previously seen and liable to deceive unless carefully examined.

25s, well executed; head of Chittenden; where it reads "Furnished only by the Assistant Treasurers" the Assistant is spell "Assistants." In the genuine the shading of the letter "E" in "Five" is unbroken, while the counterfeit has a little notch in it.

50s, well executed. The engraving on the face of the note is excellent. The adverse is slightly blurred. The notes are an eighth of an inch narrower than the genuine.

50s, the "y" in "Colby's" name crosses a line of the coat in the genuine, but not in the counterfeit.

50s, the base of stars on counterfeit between the figures "50" at the top and bottom of the back of the note have white centres, while the entire stars on genuine are in green. The reading in black on the genuine note clear and distinct, while on the counterfeit the bronze is printed on the black, the words "fifty cents" being almost obliterated.

50s, well done. The last "e" in the signature of F. E. Spinner is omitted in some, and the (.) after print, on one end, and the d. after March 30.

50s. New and dangerous counterfeits of the last issue of the fifty cent fractional currency notes, which bear upon their face the head of Treasurer Spinner, have been detected by the Treasury Department. It can be detected by the absence of a period (.) after the word print on the right end, and also under the letter "d" in "March 30," on the left end. The paper is thicker than that of the genuine notes, and the general appearance is calculated to deceive unless closely inspected.

## COUNTERFEIT 7.30 BONDS.

The seal is slightly larger than the genuine; the red ink with which it is stamped is a shade lighter, and the points projecting from the seal are blurred and a little longer than the genuine. The imprint at the bottom of the face of the bond is set different in the margin, there being more space given it than in the genuine. The borders of the coupon which are attached to the counterfeit bonds are larger, while the red figures are finer than in the genuine. The borders of the ornamental lathe work are blurred and somewhat indifferently executed. The figures denoting the bond are slightly uneven, while the blue ink in which they are printed is a duller blue and lacks the metallic glossy appearance of the genuine.
