## Foreword

Carnegie Mellon Facts is a compilation of commonly requested data and statistical information about Carnegie Mellon. It includes information about students, alumni, faculty and staff at CMU. You can use Facts to find information on admissions, enrollment, teaching, research and University finances and facilities. Facts also provides some useful comparative data from other universities. The data presented in the tables and graphs are from internal sources except where noted. The terms used are defined in the Appendix.

Carnegie Mellon Facts is intended primarily as an internal document, produced annually for use by members of the campus community. We encourage you to keep this book handy and to use it as a reference. This publication and all to follow will be placed on the World Wide Web at http://www.cmu. edu/ba/planning/main.html.

We in University Planning Services want this book to be a reliable source of accurate and useful information. Your suggestions and comments on the contents, format and usefulness of Facts will help with the continual improvement of this information tool. Please respond to the brief questionnaire enclosed for your use. Or, call University Planning at 268-8729 if you have questions or suggestions for improving the report.

Thank you.

## The University

Carnegie Mellon has emerged as one of the nation's leading private research universities. The university's interdisciplinary approach provides graduates with professional and technical skills and a strong science and liberal arts background. According to Edward B. Fiske, former education columnist for the New York Times, Carnegie Mellon's "faculty and administration have done the most original thinking of any American university in pursuing the twin goals of liberal-professional education."

Carnegie Mellon began in 1900 when industrialist Andrew Carnegie founded Carnegie Technical Schools in Pittsburgh's Oakland section. Twelve years later these schools became a degree-granting college----the Carnegie Institute of Technology. In 1967, Carnegie Tech merged with the Mellon Institute of Research to form Carnegie Mellon University.

Carnegie Mellon's internationally recognized programs encompass the areas of engineering, technology, science, liberal arts, fine arts, and public and private management. The university includes seven colleges.

The Carnegie Institute of Technology (CIT) includes six departments: Chemical Engineering, Civil, and Environmental Engineering, Electrical and Computer Engineering, Engineering and Public Policy, Mechanical Engineering, and Materials Science and Engineering, plus a program in Biomedical Engineering.

The College of Fine Arts (CFA), the first school in the nation to award a degree in drama, includes the departments of Architecture, Art, Design, Drama and Music.

The College of Humanities and Social Sciences (H\&SS) is recognized for its broad view of the liberal-professional arts and its commitment to excellence in teaching. Its departments include Economics, English, History, Modern Languages, Philosophy, Psychology, Social and Decision Sciences, and Statistics.

The Mellon College of Science (MCS), with the departments of Mathematics and Physics and the Division of Molecular Sciences showcasting research and teaching efforts in the Biological Sciences and Chemistry, is highly interdisciplinary. MCS researchers are taking the lead in new programs and research centers dealing with computational biology, biomedical research, nuclear magnetic resonance, molecular science, light microspy, nonlinear analysis and astrophysics, among many other areas.

The Graduate School of Industrial Administration (GSIA) offers a Master of Science in Industrial Administration, a degree roughly equivalent to an M.B.A. with a firmer scientific component based on the use of quantitative methods as management tools. GSIA also offers doctoral and executive education programs and now administers undergraduate programs in economics and industrial management.

The School of Computer Science (SCS) operates at the forefront of research in computing, artificial intelligence, machine translation and robotics. The school grants doctor's degrees in computer science and robotics, a master's degree in software engineering and an undergraduate degree in computer science.

The Heinz School (HNZ) offers graduate programs to educate managers and analysts for government and non-profit organizations; it awards master's degrees in Public Management and Policy, Arts Management and a doctor's degree in Public Policy Analysis.

## Mission Statement

To create and disseminate knowledge and art through research and artistic expression, teaching and learning, and transfer to society.
To serve our students by teaching them leadership and problem-solving skills, and our values of quality, ethical behavior, responsibility to society and commitment to our work.

To pursue the advantages provided by a diverse community, open to the exchange of ideas, where discovery and artistic creativity can flourish.

## Our Values and Traditions

Leadership: We lead through innovation and excellence; we establish new directions by talent and example, influencing the behavior of other institutions.

Innovation: We identify challenges and opportunities presented by evolving human needs, new research methods and technologies, and promptly assemble the talent and resources needed to exploit them. Our innovative capability is one of the foundations upon which our leadership capacity is built.

Transcending Disciplinary Boundaries: We function seamlessly and transcend traditional disciplinary boundaries to our comparative advantage.

Responsibility to Society: We serve society through transfer of technology, continuing education programs, public service and enrichment of the community through the arts.

Learning: We will build on our heritage of the Carnegie Plan to become a leading institution that combines first-rate research with outstanding undergraduate education through our focus on learning and problem-solving.

Dedication to our Work: Our students, staff and faculty are committed to our heritage emblazoned on our seal: "My Heart is in the Work."

Commitment to Quality: We focus our energies on understanding the needs of the communities we serve while applying principles of self-evaluation, benchmarking and continuous improvement to fulfill these needs.

## Graduation and Persistence Rates <br> By College and for CMU <br> Fall Semester 1995

AVERAGE WITHIN-UNIVERSITY GRADUATION RATE BY COLLEGE AND FOR CMU

AVERAGE WITHIN-UNIVERSITY PERSISTENCE RATE BY COLLEGE AND FOR CMU

Notes: Persistence is the sum of those enrolled and those who have graduated. Within university rates
show the college in which the student originally enrolled, although the student may have since transferred
internally to another college. Bars for persistence rates represent an average of the three most recent
rates available: entering classes of 1992-93, 1991-92, 1990-91, 1989-90.

Computerized Library Resources Fiscal Year 1995
The University Libraries provide several electronic information services. The Library Information System (LIS), available over the campus network, provides access to 14 databases of information, including the Library Catalog.

The Catalog contains records of items owned by the libraries, such as books, journals, technical reports, government
documents, musical scores, sound recordings and videotapes.
The catalog may also be searched through Unicorn, the new library system which has replaced LS/2000.

The Library Catalog on Unicorn includes not only the latest additions to the libraries' collections, but also lists
materials that are currently on order.

Finally, the University Libraries allow free access to OCLC's numerous First Search databases through LIS and
telnet sessions.

The University Teaching Center (UTC)
$¥$ Established in January 1982, the University Teaching Center identifies, organizes and conducts programs to improve the quality of instruction at CMU.
$¥$ Incoming Faculty Orientation.
òSurviving, Enjoying and Flourishing at Carnegie Mellonó is a three day faculty orientation that focuses on
teaching effectively and on balancing the diverse roles of faculty life.
$¥$ Faculty Luncheon Seminars
Each semester the UTC offers a series of Luncheon Seminars to all members of
the faculty. These seminars provide a forum for faculty to discuss issues about learning and teaching which
transcend disciplinary
boundaries.
$¥$ Feedback Mechanisms for Faculty: The Consultation Process
For faculty members interested in improving a course, the Teaching Center staff collects data, analyzes,
interprets and then translates this into recommendations for specific
strategies to modify the course or
classroom behavior.
$¥$ Consultations about Course Evaluations
The Teaching Center recommends distributing early course evaluations 3-4 weeks
into a semester to improve
teaching and the course. They will aid faculty members in designing,
interpreting and acting upon the results of
those evaluations.
$¥$ Creation and Implementation of Departmental and College TA Programs The UTC aids departments and colleges in assessing their needs and creating TA programs to address those needs.
$¥$ Graduate Student Seminar Series The UTC offers modules and special topic sessions on issues surrounding
teaching and learning for those TA's currently teaching or planning to teach in the future.
$¥$ Response to the Changing Needs of Departments and Colleges The University Teaching Center offers expertise and resources to departments and colleges to meet their changing needs.
