

SEA/BOB ADS-B WG/8 - SP/12

CASE STUDY ON ADS-B FACILITY

HISTORICAL BACK GROUND OF DCA , MYANMAR

Historical Background of DCA

- ❑ DCA Organization was established soon after promulgation of

Myanmar Aircraft Act 1934 and Myanmar Aircraft Rule 1937.

- ❑ Civil Aircraft Registry started on 1.4.1937

aircraft bearing Registration Mark was XY-AAA.

- ❑ Due to second World War

Civil Aviation activities in Myanmar was stopped from 1939 to 1942

- ❑ After the war on 16.12.1946

Group Captain P. Holroyd Smith was acting as a Director of Civil Aviation on contract basis for four years up to 1952.

Historical Background of DCA

- ❑ During that period, Myanmar National under went training in UK for

licenses in Crew, Engineers, and Air Traffic Controllers

After achieving those licenses, they were working in our Department

- ❑ Air Registration Board (ARB) was also contracted to

provide senior aircraft surveyor to administer airworthiness and flight operation matters up to 1962

Historical Background of DCA

- ❑ For radio communication and navigation matters

International Air radio Limited (UK) was contracted from 1953 up to 1958

to install and operate radio telecommunication and navigation network

- ❑ Myanmar professional nationals undertook responsibilities of

DCA since 1962

CNS CAPABILITIES

CNS Facilities

- ❖ 9 VOR, 3 ILS/DME,
- ❖ HF 32 stations (2 International) / VHF 32 stations (2 International)
- ❖ AFTN Network (Direct Link) Yangon – Mandalay
Yangon – Kunming
Yangon – Bangkok
- ❖ ADS-C/CPDLC
- ❖ 6 VSAT (Lashio, Mandalay, Patheingyi, Yangon, Myeik and Sittwe)
- ❖ 3 MSSR (Yangon, Mandalay, Myeik) (from Thales)
- ❖ 2 MSSR (Yangon, Mandalay) (from Alenia) as a back-up
- ❖ One Flight Calibration Unit

❖ CNS Facilities

1. Communication Facilities

▲ **HF/VHF**
(airports)

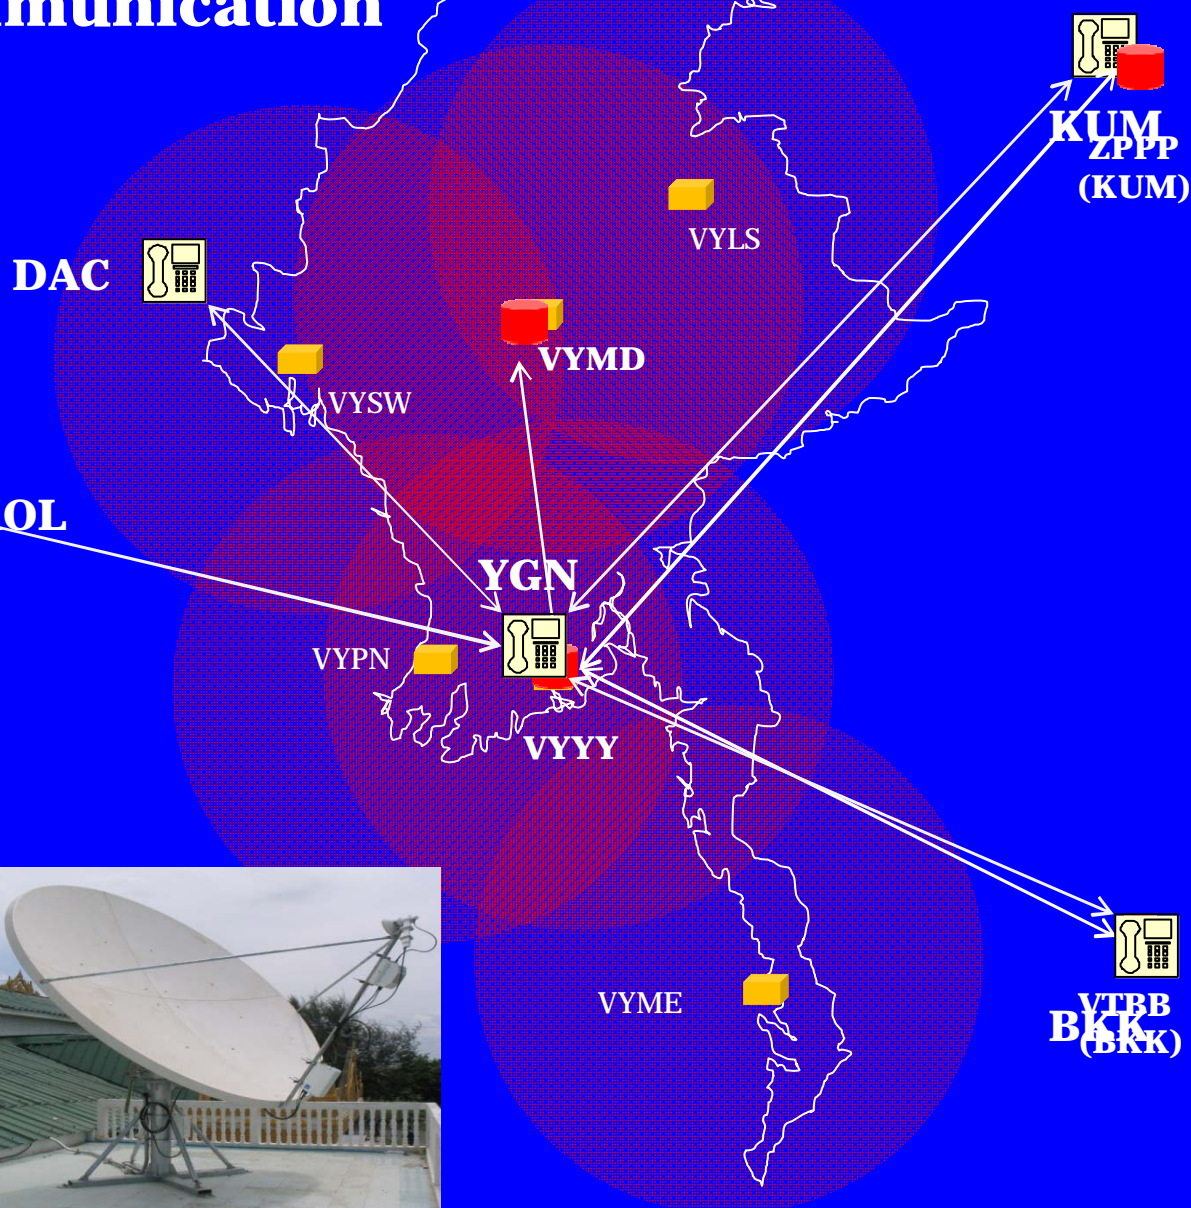

❖ CNS Facilities

Communication

-  **VSAT-RCAG**
-  **AFTN (replaced with released from AMHS in 2012)**
-  **DSC Phone**
-  **KOL**

For connection with Thailand, V-SAT was planned to change by digital system

❖ CNS Facilities

FANS-1/A Facility

ADS-C / CPDLC system

- Stand alone system was installed since 1989
- Now NEW ADS-C/CPDLC system has already been purchased and integrated into Eurocat – C ATC Automation (for FANS-1 data with new format was under processing with SITA)

Navigation capabilities

2. Navigation

-  **NDB Station**
-  **CVOR/DME Station**
-  **DVOR/DME Station**

❖ CNS Facilities

3. Surveillance

- Mandalay
- Yangon
- Myeik

- 3 MSSR for Enroute (Thales)
- 2 MSSR (Alenia) as back-up
- 1 PSR for Terminal (Mandalay)
