

International Civil Aviation Organization

CAR/SAM Regional Planning and Implementation Group (GREPECAS)

**Eighth Meeting of the GREPECAS Aeronautical Meteorology Subgroup
(AERMETSG/8)**

Santiago, Chile, 9 to 13 October 2006

AERMETSG/8 - WP/06

20/09/06

Agenda Item 5: OPMET information exchange in the CAR/SAM Regions

(Presented by the Secretariat)

SUMMARY

This working paper presents the results of the OPMET exchange control in the States/Territories of the CAR/SAM Regions in accordance with the procedures established by GREPECAS. In addition, it presents information on the results of the global control of OPMET data carried out by IATA.

References:

- Report of the Thirteenth Meeting of the CAR/SAM Regional Planning and Implementation Group (GREPECAS/13, Santiago, Chile, 2004);
- Report of the Twelfth Meeting of the CAR/SAM Regional Planning and Implementation Group (GREPECAS/12, Havana, Cuba, 2004);
- Report of the Eleventh Meeting of the SADIS Operations Group (SADISOPSG/11, Cairo, Egypt, 2006); and
- SADIS User Guide.

1. Introduction

1.1 The previous meetings of the AERMET Subgroup and the corresponding GREPECAS meetings have analyzed the results of the OPMET information exchange controls conducted by CAR/SAM States/Territories that participate in the control since 1996, in keeping with the procedures established by previous implementation meetings and by GREPECAS. Based on the results obtained in the referred controls, it could be verified that even though there have been considerable improvements in OPMET exchange in most of the States/Territories participating in the control, problems still continue in some of them, although in the majority of the cases the problems are due temporary communication failures.

2. **Discussion**

OPMET exchange controls in CAR/SAM States/Territories participating in the control

2.1 **Appendix A** to this working paper shows the results obtained in the OPMET exchange controls, corresponding to the periods from 10 to 16 June of 2006, received from CAR/SAM States/Territories, in order to be analyzed by the COM/MET Task Force, in accordance with the Terms of Reference and Work Programme, and report them to ICAO Secretariat to verify if the required reception percentages (98%) are being reached.

2.2 The meeting will recall that the AERMETSG/6 meeting approved Draft Conclusion 6/15, which was subsequently adopted by GREPECAS through Conclusion 12/64 in which it was agreed to carry out OPMET exchange controls annually, from 10 to 16 June.

2.3 Furthermore, the subgroup will recall that CAR/SAM FASID Table MET 2A was amended, among others, as a follow up to GREPECAS Conclusion 13/26, and the aerodromes not included in FASID Table AOP 1 of the States/Territories which have accepted to send OPMET information to the ISCS and SADIS, were included in italics. However, following paragraph b) of the Draft Conclusion in paragraph 3.3.3 of WP/07, in an Appendix to the CAR/SAM Guide for OPMET exchange, which is being developed by the AERMETSG COM/MET Task Force, an operational table with OPMET exchange requirements (METAR/SPECI and TAF) in CAR/SAM States/Territories would be included. A draft of same is included as **Appendix B** to this working paper.

2.4 In this context, the subgroup could agree to continue with the annual (10 to 16 June) OPMET exchange controls intra-regionally, which will continue being developed by the COM/MET Task Force in accordance with its Terms of Reference and Work Programme.

Global OPMET information Exchange controls

2.5 The meeting could take note that the Eleventh Meeting of the ICAO SADIS Operations Group (SADISOPSG/11), carried out from 23 to 25 May 2006, formulated Conclusion 11/8, requesting the Secretariat to invite States/Territories which do not make available OPMET data from aerodromes listed in the Table AOP, in accordance with the SADIS User Guide (SUG), Annex 1, as shown in **Appendix C**¹ to this working paper, to implement their dissemination to the SADIS, as a matter of urgency. Furthermore, could consider the “*Note*” of the referred Conclusion “*The goal of the availability of OPMET information distributed via SADIS from AOP aerodromes is 95 per cent*”.

2.6 In this regard, and following the constant concern of the AERMETSG and GREPECAS in the improvement of the exchange in the CAR/SAM Regions, the subgroup could note that on the basis of Appendix F – List of missing OPMET data during the monitoring period by IATA, of the SADISOPSG/11 Report, the OPMET information of the SAM Region was received by IATA in a 96.5% and the information from the CAR Region in a 74.3%, as indicated in the following analysis:

¹ **Appendix C** corresponds to Appendix F to SADISOPSG/11 report.

OPMET DATA RECEPTION BY IATA		
ON THE BASIS OF APRENDIX F TO THE SADISOPSG/11 REPORT		
	CAR REGION	SAM REGION
No. of Aerodromes Listed (SUG)	140	142
No. of Aerodromes with missing data	36	5
No. of Aerodromes from which OPMET information was received	104	137
Reception %	74.3%	96.5%

2.7 In order to have easy to analyze information including the detailed percentage of global OPMET data controls, the meeting could agree that the SADISOPSG consider the identification of aerodromes which do not issue OPMET data throughout 24 hours in Annex 1 to the SADIS User Guide, and formulate the following draft conclusion:

DRAFT
CONCLUSION 8/XX FORMATS FOR THE GLOBAL EXCHANGE OF OPMET DATA

That, in order to improve the reliability of the periodic assessments of the availability of OPMET data, the SADISOPSG consider the identification of aerodromes which do not issue OPMET data throughout 24 hours in Annex 1 to the SADIS User Guide.

OPMET information required to be disseminated to the ISCS and SADIS

2.8 The meeting shall recall that GREPECAS formulated Conclusion 12/55 – SADIS User Guide, which was endorsed to the WAFSOPSG, which during its Second Meeting (Bangkok, Thailand 2005), formulated Conclusion 2/5 – Development of the ISCS User Guide, through which WAFC Washington, in coordination with the ICAO Secretariat, was invited to develop an ISCS User Guide with a scope similar to that covered by the SADIS User Guide. This Conclusion clarified with a note, that there was no need to develop Annex 1 entitled “*OPMET information required from aerodromes to be included on the ISCS broadcast*”, nor Annex 4 entitled “*WAFS forecasts disseminated on the ISCS*” since OPMET and WAFS data required to be included in the ISCS are identical to that included in SADIS.

2.9 In this regard, the meeting could note that the current requirements of the States/Territories and METAR, SPECI and TAF users to be broadcast on the SADIS were given in Annex 1 to the SADIS User Guide (SUG), copy of which, updated to 20 April 2006, is presented as **Appendix D** to this working paper. Annex 1 includes OPMET information from both AOP (i.e. aerodromes included in the aerodrome operational planning (AOP) tables of the regional air navigation plans) and non- AOP aerodromes. In response to Conclusion 8/6, OPMET information from all the AOP aerodromes was

included therein. It is expected that all AOP aerodromes issue, at least, METAR and SPECI (unless otherwise indicated in the remarks column). The subgroup would recall that the requirements for TAF are subject to a formal regional air navigation (RAN) agreement, which are reflected in FASID Tables MET 1A of all the regional air navigation plans ANP/facilities and services implementation documents (FASID). Annex 1 to the SUG had simply to reflect these formal tables.

2.10 With regard to non-AOP aerodromes, the subgroup was aware of the fact that OPMET information from these aerodromes could be included in Annex 1 only if the State/Territory concerned has no objection to its distribution on the SADIS (ISCS) and with the understanding that States/Territories do not have any obligation of providing such data for non-AOP aerodromes.

3. **Action proposed**

3.1 The meeting is invited to:

- a) take note of the information contained in this working paper;
- b) adopt the Draft Conclusion included in paragraph 2.7; and
- c) agree other actions as necessary.
